

# Android Ruggedized PDA

## Series Highlights:

- Android 2.2
- SAMSUNG S5PC110 1GHz
- Memory RAM 512 MB/ROM 512 MB
- WVGA TFT LCD 480W x 800L with backlight
- UHF 900MHz GEN2, ISO/IEC 18000-6C
- 1D Laser Barcode Scanner
- WLAN(IEEE802.11 b/g)
- 3G HSDPA
- Bluetooth Class II, v2.0
- 5.0M Camera with Flash

## **FCC Compliance Information**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions:

- (1) the device may not cause interference, and
- (2) the device must accept any interference, including interference that may cause undesired operation of this device.

For body-worn operation, this device has been tested and meets the FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5cm from the user's body.

**NOTE: THE GRANTEE IS NOT RESPONSIBLE FOR ANY CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.**

< Front view >

< Side view >

### 1.3 Name of each part #2

< Front >

< Bottom >

## 2. Power

This section introduces the power system of AT911 as power switch and battery

### 2.1 Power ON/OFF

#### 2.1.1 Power ON

1. Press power key, the AT911 and the backlight will be on
2. Idle to conserve battery power when power is turned on, the backlight is OFF

#### 2.1.2 Power OFF

1. Press power key, you actually suspend the AT911 and turn off the display and backlight.

### 2.2 Battery

AT911 uses replaceable 2200mAh Li-ion batteries

If the battery continues to drop to the “Low battery Status” the battery status LED becomes red and blinks. You need to recharge the battery

#### 2.2.1 Checking battery Power

You can check the battery status by using the power applet.

Settings > Power

If you open this ICON you can check the Battery power gauge.

#### 2.2.2 Very Low battery status

To prevent the AT911 from being discharged completely, your AT911 will be suspended, when the battery continues to get low. You need to recharge your battery before the battery continues to drop

### 2.3 Removing and installing the battery

#### 2.3.1 Removing the battery

If you are using the Gun handle, please remove the Gun handle first from device, and you do not have to remove whole body, just remove top or bottom then change the battery

#### 2.3.2 Installing the battery

Insert the bottom of battery into the sunken place located in battery compartment and press the battery latch to the above until the battery is installed completely.

### 2.4 Battery discharging

Several factors determine the life of your battery such as extreme temperatures, input devices, and your usage, but generally you can use At911 for 5~12 hours.

### 2.5 Recharging the battery

Use the adapter provided from ATID to recharge your battery

#### Caution

Your AT870 can be damaged, in case of using the adapter that is not provided from ATID

### 2.5.1 Using the adapter

1. Connect the adapter to the power cord.
2. Connect the DC power jack to the AT911
3. When the battery is charging, the LED becomes red  
(PDA's power LED is not lit, press the power button on the side)

### 2.6 Disposal of the spent battery

When the battery reaches the end of useful life, the spent battery must be disposed by a qualified recycler or material handler

#### Warning

Do not mix the spent battery with the solid waste stream and keep away from children

### 3. AT911System Reset

When the AT911 completely stops responding for your command or an application is locked up and does not respond, and when you want to upgrade the firmware, it maybe necessary to perform a system reset.

#### Caution

Once you initiate a system reset, all applications are forcibly closed and working RAM and files are cleared. It is a good idea to store important data in the resident Flash Disk) for this reason.

#### Warning

Do not sure force of a sharp object like paper clip to press the reset button. Use the stylus for that purpose. Sharp object like paper clip could puncture the seal of the reset key

#### 3.1 Cold Reset (Hard reset)

When you should perform the system reset?

If the performed reset method fails to restore system operation, it may be necessary to perform a system reset.

#### Reset procedure

To perform a system reset simultaneously press the <Reset> key with the stylus during pressing the poser key
