1. How does this device operate?

Answer: Power is provided by DC 3.7V by Battery, Input DC 5V supply by Adaptor, Car Adaptor or USB cable.

Frequencies are selected by a left/right using the touch screen on the EUT.

2. Provide information on the device and its antenna.

Answer: The antenna is a built-in trace on the circuit board. (Please see the user's manual and circuit).

Please check it.

3. How is it installed?

Answer: Plug-in connector is inserted into the DC 3.7V by Battery, Input DC 5V supply by Adaptor, Car Adaptor or USB cable power source.

No other installation is required.

4. What test procedure was used?

Answer: ANSI C63.4-2003.

5. If tested in a car, how was it configured/tested?

Answer: It is not tested in an automobile.

It was tested in a 3-meter test site as shown in the Test Setup Photo.

6. Was the tuning range properly verified? The test lab should indicate in the report that the tuning controls were manually adjusted to verify maximum tuning range.

Answer:

Only the frequency bands (88.1-107.9 MHz, channel spacing: 200 KHz) are available. Please check Page 4 of 20 the test report.

7. Was the bandwidth properly tested with maximum audio input?

Answer: We play the inside MP3 files of the product with the maximum audio input.

8. Provide the test report.

Answer: Please check the supplied test report document.

Thank you!
