

100 Center Point Circle  
Suite 200  
Columbia, SC 29210

Attention: Steven Hackett , Product Regulations Engineer

**NOT TRANSFERABLE**

EQUIPMENT AUTHORIZATION is hereby issued to the named GRANTEE, and is VALID ONLY for the equipment identified hereon for use under the Commission's Rules and Regulations listed below.

FCC IDENTIFIER: PD962205ANHU  
Name of Grantee: Intel Corporation  
Equipment Class: Unlicensed National Information Infrastructure TX  
Notes: Intel Centrino Advanced-N 6205  
Modular Type: Single Modular

Power Output listed is conducted. Limited Modular Approval. This is a Class II Permissive Change to establish the most conservative antenna-to-user separation distance of 0mm for Laptop/Notebook/Netbook and Tablet Computers. The antenna(s) used for this device must be installed to provide a separation distance of at least 0mm from all persons and must not be co-located with any other transmitters, except in accordance with FCC multitransmitter product procedures. Grantee must coordinate with OEM integrators to determine applicable host configurations to ensure RF exposure compliance, including simultaneous transmission SAR requirements according to published KDB 616217 Supplement documentation. This module is approved in mobile/portable configurations. Only those antenna(s) tested with the device or similar antenna(s) with equal or lesser gain may be used with this transmitter. This transmitter is restricted to indoor use only within the 5.15-5.25GHz and 5.470-5.725GHz bands. The transmitter is also restricted under the premise that it shall meet all the other requirements specified in Section 15.407 and no configuration controls are provided to change the frequency of operations outside the grant of certification for US operation. When all conditions of this filing cannot be met installation of this device into specific final products may require the submission of a permissive change application, containing appropriate data demonstrating compliance, or a new application. This device must utilize the bios locking features as documented in this filing. Users and installers must be provided with antenna installation instructions and transmitter operating conditions to satisfy RF exposure compliance. OEM/Host integrator is responsible for complying with the instructions and requirements for each transmitter they choose to integrate into a host product.

The highest measured body SAR value at 0mm antenna-to-user separation distance in Laptop/Notebook/Netbook and Tablet Computer hosts is: 1.15 W/kg.

CC: This device is certified pursuant to two different Part 15 rules sections.
