(3) Country code selection ability ☐ Yes ☐ No If yes, pls explain how it was implemented:									
(4) Meet 15.202 requirement									
(5)	For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non- DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes cannot be modified by end user or an installer.  Apply  Does not apply  (If apply, pls help to provide explanation on it was implement, and how software was controlled)
