Rule Part	15.247

Overview

This application is for an original limited singular modular approval for a 2.4 GHz Free scale Zigbee radio in the model NMT-NcIQ, FCC ID: VXZNMT-NCIQ1. This new innovation measures and reports critical hemodynamic data of casualties or patients as well as their location which is reported to an electronic platform such as a laptop or PDA, used by the medic or first responder. The 2.4 GHz radio is configured with a 915MHz field disturbance sensor, FCC ID: VXZNMT-NCIQ2, in the NMT-NcIQ (host device). The RF Exposure conditions for the device is portable.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Short term confidentiality requested.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
