Agent	None
Approval Type	Original
Equipment Class	FDS Field Disturbance Sensor
Rule Part	15.245

Overview

This application is for an original limited modular approval for a 920 MHz radio in the model NMT-NcIQ. This new innovation measures and reports critical hemodynamic data of casualties or patients as well as their location which is reported to an electronic platform such as a laptop or PDA, used by the medic or first responder.

The 920 MHz radio can be co-located with a 2.4 GHz radio. The RF Exposure conditions for the device is portable.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
