

22nd February 2017

Federal Communications Commission
Equipment Authorisation Branch
7435 Oakland Mills Road
Columbia MD 21046

REF: FCC ID: VYMFVALIDATOR

To Whom It May Concern:

The Validator has no acceptable space on the front of the case to affix the FCC or any other registration information. The back plate that covers the label is removable and is not used during operation therefore making it inappropriate location for the product label. We have chosen to put the FCC information under the back plate due to its large size and permanent structure. The label information will be on the user's manual.

Please accept this explanation as the solution for locating the FCC information on the Validator.

Kind Regards

Thomas James Coggins
