## **Explanation Letter**

Applicant:	Loopcomm Technology, Inc.
FCC ID:	VYTLP2596K
Correspondence Reference Number:	187271
Form 731 number:	TC730034

Dear Mr. Dichoso,

This application was originally reviewed and certified on March 26, 2014.

In our review process we received confirmation at that time from the accredited test lab WTS in Taiwan as well as from the applicant Grantee Loopcomm Technology that the DTS device only operates in the 5.8 GHz band.

The exhibit 'users manual' was provided by the applicant in two parts because of the size of PDF documents. In part 2 of 2 of the 'users manual' was a description of the configuration software which allows the user to configure other US operations. This was not acknowledged by us at the time of the review.

We apologize for any inconveniences this may have caused.

We conducted internally training for all of our reviewers/certifiers to prevent nonconformities like that in the future.

Sincerely,

Joerg Kusig  
Head of Certification Body
