

DC1520/DC1522 Emitter Specification

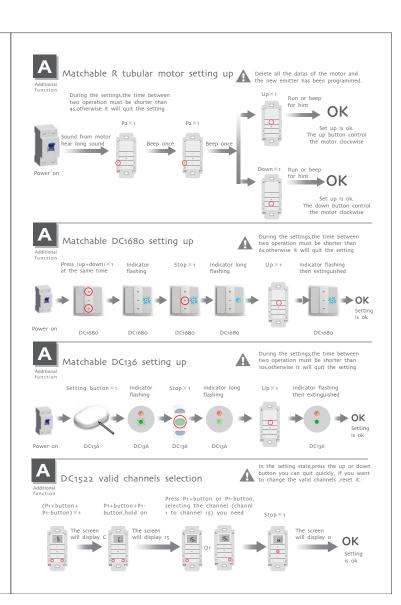

DC1520 Single - channel emitter **DC1522** 15 - channel emitter DC1520 DC1522 Back side

Technical specification	Fucntion instruction
Input voltage: 3V Transmitting frequency: 433MHz Transmitting power: 10 millilwatt Operating temperature: 10°C—50°C Transmission distance: 200 meters open office, 35 meters on two walls	Disga fifteen channels double control emitter: each channel had the same function with Disga. Den number of LGD screen means one control channel. Press "channel choose" button Pr. (number descending) or Pr. (number the indicator light move to suitable channel that you select effective channel. If LGD screen number show "o" that means the group control status. Under the status of group cortrol, pressing a way button will start the available. Pressing button will start the available. Pressing be way buttons will start the group-control function of b way, but yor of all the channels will start the group-control function of b way, but yor of all the channels will be available.
	CAUTION BISS OF EPROSON IF BATTERY IS REPLACED BY AN INCORRECT TYPE. BISSONS OF USED BATTERIS ACCORDING TO THE INSTRUCTIONS NOTICE TEARMHITTER OF OUT EXPOSED TO THE STRUCTIONS NOTICE TEARMHITTER OF OUT EXPOSED TO THE STRUCTIONS NOTICE TEARMHITTER OF OUT EXPOSED TO THE STRUCTIONS NOTICE TEARMHITTER OF OUT EXPOSED TO THE STRUCTION OF THE STRUCT

FCC STATEMENT

- 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.
- 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
