

# Supplemental "Transmit Simultaneously" Test Report

Report No.: RF170809E07A-2

FCC ID: VZ9170001

Test Model: EAP738

Series Model: HSG328

Received Date: Aug. 09, 2017

Test Date: Sep. 21 to 23, 2017

Issued Date: Feb. 21, 2018

Applicant: 4IPNET, INC.

Address: 5F., No.367, Fuxing N. Rd., Songshan Dist., Taipei City 105, Taiwan

Issued By: Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch

Hsin Chu Laboratory

Lab Address: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300,

Taiwan R.O.C.

Test Location: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300,

Taiwan R.O.C.

FCC Registration /

723255 / TW2022 **Designation Number:** 

This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specific mention, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification. This report should not be used by the client to claim product certification, approval, or endorsement by TAF or any government agencies.

Report Format Version: 6.1.1

#### **Certificate of Conformity** 1

**Product:** Enterprise Access Point

Brand: 4ipnet

Test Model: EAP738

Series Model: HSG328

Sample Status: ENGINEERING SAMPLE

Applicant: 4IPNET, INC.

Test Date: Sep. 21 to 23, 2017

**Standards:** 47 CFR FCC Part 15, Subpart C (Section 15.247)

47 CFR FCC Part 15, Subpart E (Section 15.407)

ANSI C63.10: 2013

The above equipment has been tested by Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's EMC characteristics under the conditions specified in this report.

#### **Summary of Test Results** 2

| 47 CFR FCC Part 15, Subpart C, E (SECTION 15.247, 15.407)        |                                                 |        |                                                                                 |  |  |  |  |  |  |
|------------------------------------------------------------------|-------------------------------------------------|--------|---------------------------------------------------------------------------------|--|--|--|--|--|--|
| FCC<br>Clause                                                    | Test Item                                       | Result | Remarks                                                                         |  |  |  |  |  |  |
| 15.207                                                           | AC Power Conducted<br>Emission                  | PASS   | Meet the requirement of limit. Minimum passing margin is -5.52dB at 0.36094MHz. |  |  |  |  |  |  |
| 15.205 / 15.209 /<br>15.247(d)<br>15.407(b)<br>(1/2/3/4(i/ii)/6) | Radiated Emissions and Band<br>Edge Measurement | PASS   | Meet the requirement of limit. Minimum passing margin is -5.6dB at 35.94MHz.    |  |  |  |  |  |  |

#### **Measurement Uncertainty** 2.1

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the EUT as specified in CISPR 16-4-2:

| Measurement                        | Frequency      | Expanded Uncertainty (k=2) (±) |  |  |
|------------------------------------|----------------|--------------------------------|--|--|
| Conducted Emissions at mains ports | 150kHz ~ 30MHz | 1.84 dB                        |  |  |
| Radiated Emissions up to 1 GHz     | 30MHz ~ 1GHz   | 5.30 dB                        |  |  |
|                                    | 1GHz ~ 6GHz    | 5.16 dB                        |  |  |
| Radiated Emissions above 1 GHz     | 6GHz ~ 18GHz   | 4.91 dB                        |  |  |
|                                    | 18GHz ~ 40GHz  | 5.30 dB                        |  |  |

#### 2.2 **Modification Record**

There were no modifications required for compliance.

Note:

1. Simultaneously transmission condition

| Condition                                                                                           |               | Technology  |           |  |  |  |  |  |
|-----------------------------------------------------------------------------------------------------|---------------|-------------|-----------|--|--|--|--|--|
| 1                                                                                                   | WLAN (2.4GHz) | WLAN (5GHz) | Bluetooth |  |  |  |  |  |
| Note: The emission of the simultaneous operation has been evaluated and no non-compliance was found |               |             |           |  |  |  |  |  |

# 2. The EUT has two model names, which are identical to each other in all aspects except for the following information:

| Brand  | Model Name | Difference             |
|--------|------------|------------------------|
| 4:     | EAP738     | E d . C                |
| 4ipnet | HSG328     | For marketing purpose. |

From the above models, model: **EAP738** was selected as representative model for the test and its data was recorded in this report.

Report No.: RF170809E07A-2 Page No. 6 / 30 Report Format Version: 6.1.1 Reference No.: 180108E07

3. The EUT must be supplied with power adapter or POE (only for test not for sale) as below table.

| Adapter                    |             |                                     |  |  |  |  |  |  |
|----------------------------|-------------|-------------------------------------|--|--|--|--|--|--|
| Brand                      | Spec.       |                                     |  |  |  |  |  |  |
|                            |             | AC Input: 100-240Vac, 50/60Hz, 0.5A |  |  |  |  |  |  |
| APD                        | WA-12M12FU  | DC Output: 12V, 1.0A                |  |  |  |  |  |  |
|                            |             | DC Output cable: unshielded, 1.8m   |  |  |  |  |  |  |
| POE (only for test not for | sale)       |                                     |  |  |  |  |  |  |
| Brand                      | Model No.   | Spec.                               |  |  |  |  |  |  |
| NIA                        | CDT 400405A | AC Input: 100-240Vac, 50/60Hz       |  |  |  |  |  |  |
| NA                         | GRT-480125A | DC Output: 48Vdc, 1250mA            |  |  |  |  |  |  |

4. For radiated emissions, the EUT was pre-tested under the following modes:

| Test Mode | Description        |
|-----------|--------------------|
| Mode A    | Power from Adapter |
| Mode B    | Power from POE     |

From the above modes, the worst case was found in Mode A. Therefore only the test data of the mode was recorded in this report.

| b. The antennas provided to the EUT, please refer to the following table: |                    |                  |                          |                        |                 |                     |                 |          |                  |            |                         |                     |

### Note:

- All of modulation mode support beamforming function except 2.4GHz & 802.11a modulation mode.
   The EUT support Beamforming and CDD mode, therefore both mode were investigated and the worst case scenario was identified. The worst case data were presented in test report.
- 7. The above EUT information is declared by manufacturer and for more detailed features description, please refer to the manufacturer's specifications or user's manual.

Report No.: RF170809E07A-2 Reference No.: 180108E07

### 3.1.1 Test Mode Applicability and Tested Channel Detail

| EUT<br>Configure |              | Applica | able To      |    | Description        |
|------------------|--------------|---------|--------------|----|--------------------|
| Mode             | RE≥1G        | RE<1G   | PLC          | ОВ | Description        |
| 1                | $\checkmark$ | √       | $\checkmark$ | √  | Powered by adapter |
| 2                | -            | -       | V            | -  | Powered by POE     |

Where

**RE≥1G**: Radiated Emission above 1GHz

RE<1G: Radiated Emission below 1GHz

PLC: Power Line Conducted Emission

**OB:** Conducted Out-Band Emission Measurement

#### NOTE

1. The EUT had been pre-tested on the positioned of each 2 axis (X-plane is mounting on a Ceiling T-Bar; Z-plane is mounting on a wall). The worst case was found when positioned on X-plane.

2. "-"means no effect.

### Radiated Emission Test (Above 1GHz):

Following channel(s) was (were) selected for the final test as listed below.

# 3.2.1 Configuration of System under Test

# Mode 1:

#### 4 **Test Types and Results**

#### 4.1 **Radiated Emission and Bandedge Measurement**

#### **Limits of Radiated Emission and Bandedge Measurement** 4.1.1

Radiated emissions which fall in the restricted bands must comply with the radiated emission limits specified as below table.

| Frequencies<br>(MHz) | Field Strength<br>(microvolts/meter) | Measurement Distance (meters) |
|----------------------|--------------------------------------|-------------------------------|
| 0.009 ~ 0.490        | 2400/F(kHz)                          | 300                           |
| 0.490 ~ 1.705        | 24000/F(kHz)                         | 30                            |
| 1.705 ~ 30.0         | 30                                   | 30                            |
| 30 ~ 88              | 100                                  | 3                             |
| 88 ~ 216             | 150                                  | 3                             |
| 216 ~ 960            | 200                                  | 3                             |
| Above 960            | 500                                  | 3                             |

#### NOTE:

- The lower limit shall apply at the transition frequencies. 1.
- 2. Emission level  $(dBuV/m) = 20 \log Emission level (uV/m)$ .
- 3. For frequencies above 1000MHz, the field strength limits are based on average detector, however, the peak field strength of any emission shall not exceed the maximum permitted average limits, specified above by more than 20dB under any condition of modulation.

Limits of unwanted emission out of the restricted bands

| Limits of driwafited emission out of the restricted bands |               |                  |                                                                                         |                                                                                             |  |  |

<sup>&</sup>lt;sup>1</sup> beyond 75 MHz or more above of the band edge.

# Note:

The following formula is used to convert the equipment isotropic radiated power (eirp) to field strength:

$$E = \frac{1000000\sqrt{30P}}{3}$$
 µV/m, where P is the eirp (Watts).

Report No.: RF170809E07A-2 Page No. 14 / 30 Report Format Version: 6.1.1 Reference No.: 180108E07

below the band edge increasing linearly to 10 dBm/MHz at 25 MHz above.

<sup>\*3</sup> below the band edge increasing linearly to a level of 15.6 dBm/MHz at 5 MHz above.

from 5 MHz above or below the band edge increasing linearly to a level of 27 dBm/MHz at the band edge.

# NOTE:

- 1. The calibration interval of the above test instruments is 12 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 2. \*The calibration interval of the above test instruments is 24 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 3. The test was performed in 966 Chamber No. 4.
- 4. The CANADA Site Registration No. is 20331-2.
- 5. Loop antenna was used for all emissions below 30 MHz.
- 6. Tested Date: Sep. 21, 2017.

#### 4.1.3 **Test Procedures**

#### For Radiated emission below 30MHz

- a. The EUT was placed on the top of a rotating table 0.8 meters above the ground at a 3 meter chamber room. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- c. Both X and Y axes of the antenna are set to make the measurement.
- d. For each suspected emission, the EUT was arranged to its worst case and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The test-receiver system was set to Quasi-Peak Detect Function and Specified Bandwidth with Maximum Hold Mode.

### NOTE:

1. The resolution bandwidth and video bandwidth of test receiver/spectrum analyzer is 9kHz at frequency below 30MHz.

#### For Radiated emission above 30MHz

- The EUT was placed on the top of a rotating table 0.8 meters (for 30MHz ~ 1GHz) / 1.5 meters (for above 1GHz) above the ground at 3 meter chamber room for test. The table was rotated 360 degrees to determine the position of the highest radiation.
- The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top b. of a variable-height antenna tower.
- The height of antenna is varied from one meter to four meters above the ground to determine the C. maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.
- For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The test-receiver system was set to quasi-peak detect function and specified bandwidth with maximum hold mode when the test frequency is below 1 GHz.
- f. The test-receiver system was set to peak and average detect function and specified bandwidth with maximum hold mode when the test frequency is above 1 GHz. If the peak reading value also meets average limit, measurement with the average detector is unnecessary.

#### Note:

- The resolution bandwidth and video bandwidth of test receiver/spectrum analyzer is 120kHz for 1. Quasi-peak detection (QP) at frequency below 1GHz.
- The resolution bandwidth of test receiver/spectrum analyzer is 1 MHz and the video bandwidth is 3 MHz 2. for Peak detection (PK) at frequency above 1GHz.
- The resolution bandwidth of test receiver/spectrum analyzer is 1MHz and the video bandwidth is ≥ 1/T 3. (Duty cycle < 98%) or 10Hz (Duty cycle ≥ 98%) for Average detection (AV) at frequency above 1GHz.
- 4. All modes of operation were investigated and the worst-case emissions are reported.

#### 4.1.4 **Deviation from Test Standard**

No deviation.

# 4.1.5 Test Setup

# For Radiated emission below 30MHz

# For Radiated emission 30MHz to 1GHz

# For Radiated emission above 1GHz

For the actual test configuration, please refer to the attached file (Test Setup Photo).

# 4.1.6 EUT Operating Conditions

- a. Connected the EUT with the Laptop which is placed on remote site.
- b. Contorlling software (QRCT[Ver 3.0.187.0]) has been activated to set the EUT on specific status.

# **REMARKS**:

- 1. Emission Level(dBuV/m) = Raw Value(dBuV) + Correction Factor(dB/m)
- 2. Correction Factor(dB/m) = Antenna Factor(dB/m) + Cable Factor(dB) Pre-Amplifier Factor(dB)
- 3. The other emission levels were very low against the limit.
- 4. Margin value = Emission Level Limit value

Report No.: RF170809E07A-2 Reference No.: 180108E07 Page No. 20 / 30 Report Format Version: 6.1.1

### 4.2 Conducted Emission Measurement

# 4.2.1 Limits of Conducted Emission Measurement

| Fragues av (MILIT) | Conducted Limit (dBuV) |         |  |  |  |
|--------------------|------------------------|---------|--|--|--|
| Frequency (MHz)    | Quasi-peak             | Average |  |  |  |
| 0.15 - 0.5         | 66 - 56                | 56 - 46 |  |  |  |
| 0.50 - 5.0         | 56                     | 46      |  |  |  |
| 5.0 - 30.0         | 60                     | 50      |  |  |  |

Note: 1. The lower limit shall apply at the transition frequencies.

#### Note:

- 1. The calibration interval of the above test instruments are 12 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 2. The test was performed in Shielded Room No. 1.
- 3. Tested Date: Sep. 23, 2017.

Report No.: RF170809E07A-2 Page No. 21 / 30 Report Format Version: 6.1.1 Reference No.: 180108E07

<sup>2.</sup> The limit decreases in line with the logarithm of the frequency in the range of 0.15 to 0.50MHz.

#### 4.2.3 Test Procedures

- a. The EUT was placed 0.4 meters from the conducting wall of the shielded room with EUT being connected to the power mains through a line impedance stabilization network (LISN). Other support units were connected to the power mains through another LISN. The two LISNs provide 50 ohm/ 50uH of coupling impedance for the measuring instrument.
- b. Both lines of the power mains connected to the EUT were checked for maximum conducted interference.
- The frequency range from 150kHz to 30MHz was searched. Emission levels under (Limit 20dB) was not recorded.

**NOTE:** The resolution bandwidth and video bandwidth of test receiver is 9kHz for quasi-peak detection (QP) and average detection (AV) at frequency 0.15MHz-30MHz.

#### 4.2.4 Deviation from Test Standard

No deviation.

### 4.2.5 Test Setup

Note: 1.Support units were connected to second LISN.

For the actual test configuration, please refer to the attached file (Test Setup Photo).

# 4.2.6 EUT Operating Conditions

Same as 4.1.6.

Report No.: RF170809E07A-2 Page No. 22 / 30 Report Format Version: 6.1.1 Reference No.: 180108E07

# 4.2.7 Test Results (Mode 1)

- 5. Emission Level = Correction Factor + Reading Value

# 4.2.8 Test Results (Mode 2)

| Phase  | Line (L) | Detector Function | Quasi-Peak (QP) / |
|--------|----------|-------------------|-------------------|
| Filase | Line (L) | Detector Function | Average (AV)      |

|    | Phase Of Power : Line (L) |                   |                      |       |       |                |                 |       |                |        |
|----|---------------------------|-------------------|----------------------|-------|-------|----------------|-----------------|-------|----------------|--------|
| No | Frequency                 | Correction Factor | Reading Value (dBuV) |       |       | n Level<br>uV) | Limit<br>(dBuV) |       | Margin<br>(dB) |        |
|    | (MHz)                     | (dB)              | Q.P.                 | AV.   | Q.P.  | AV.            | Q.P.            | AV.   | Q.P.           | AV.    |
| 1  | 0.15391                   | 10.07             | 43.23                | 33.29 | 53.30 | 43.36          | 65.79           | 55.79 | -12.49         | -12.43 |
| 2  | 0.18516                   | 10.06             | 39.12                | 30.89 | 49.18 | 40.95          | 64.25           | 54.25 | -15.07         | -13.30 |
| 3  | 0.35703                   | 10.10             | 41.33                | 31.39 | 51.43 | 41.49          | 58.80           | 48.80 | -7.37          | -7.31  |
| 4  | 0.49375                   | 10.11             | 28.81                | 18.95 | 38.92 | 29.06          | 56.10           | 46.10 | -17.18         | -17.04 |
| 5  | 0.82969                   | 10.13             | 28.35                | 20.11 | 38.48 | 30.24          | 56.00           | 46.00 | -17.52         | -15.76 |
| 6  | 1.77734                   | 10.14             | 22.11                | 14.31 | 32.25 | 24.45          | 56.00           | 46.00 | -23.75         | -21.55 |

### Remarks:

- 1. Q.P. and AV. are abbreviations of quasi-peak and average individually.
- 2. The emission levels of other frequencies were very low against the limit.
- 3. Margin value = Emission level Limit value
- 4. Correction factor = Insertion loss + Cable loss
- 5. Emission Level = Correction Factor + Reading Value

#### 4.3 Conducted Out of Band Emission Measurement

#### 4.3.1 Limits of Conducted Out of Band Emission Measurement

Below 30dB of the highest emission level of operating band (in 100kHz Resolution Bandwidth).

#### 4.3.2 Test Setup

#### 4.3.3 Test Instruments

Refer to section 4.1.2 to get information of above instrument.

#### 4.3.4 Test Procedures

#### **MEASUREMENT PROCEDURE REF**

- 1. Set the RBW = 100 kHz.
- 2. Set the VBW ≥ 300 kHz.
- 3. Detector = peak.
- 4. Sweep time = auto couple.
- 5. Trace mode = max hold.
- 6. Allow trace to fully stabilize.
- 7. Use the peak marker function to determine the maximum power level in any 100 kHz band segment within the fundamental EBW.

### **MEASUREMENT PROCEDURE OOBE**

- 1. Set RBW = 100 kHz.
- 2. Set VBW ≥ 300 kHz.
- 3. Detector = peak.
- 4. Sweep = auto couple.
- 5. Trace Mode = max hold.
- 6. Allow trace to fully stabilize.
- 7. Use the peak marker function to determine the maximum amplitude level.

#### 4.3.5 Deviation from Test Standard

No deviation.

### 4.3.6 EUT Operating Conditions

The software provided by client to enable the EUT under transmission condition continuously at lowest, middle and highest channel frequencies individually.

#### 4.3.7 Test Results

The spectrum plots are attached on the following pages. D1 line indicates the highest level, and D2 line indicates the 30dB offset below D1. It shows compliance with the requirement.

# Appendix - Information on the Testing Laboratories

We, Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch, were founded in 1988 to provide our best service in EMC, Radio, Telecom and Safety consultation. Our laboratories are FCC recognized accredited test firms and accredited according to ISO/IEC 17025.

If you have any comments, please feel free to contact us at the following:
