Timco engineering inc.
849 NW State Road 45
FCC Approvals
Newberry, Florida 32669

Dear Sir / Madame:

This letter is a request to have different FCC IDs for different types of Infant Tags made by Guard RFID Solutions. The following Tags require independent FCC IDs:

Tag Type	FCC ID
Tot Tag 1	VZKTT1 granted on August 11, 2008
Tot Tag 2	VZKTT2
Umbilical Tag	VZKUT2

All of these Tags are used for infant protection. They operate identically from RF standpoint. The primary difference is in battery size, tamper mechanism and a form factor which is different depending how is the Tag attached to a baby.

The test report for FCC ID: VZKTT1 continues to be representative and applicable to the equipment with the new FCC ID

Regards,

Dalibor Pokrajac
