

**EUT Photo-Internal View**

 A photograph showing the internal components of a device with the cover removed. A green printed circuit board (PCB) is visible, featuring a square component in the center. To the right of the PCB is a white plastic frame. The components are placed on a blue fabric surface next to a metal ruler for scale.	 A photograph of the main board from the front. The green PCB is populated with various electronic components, including a small battery, a microcontroller, and several surface-mount components. The board is placed on a blue fabric surface next to a metal ruler.

 A photograph of the main board from the rear. The green PCB is shown with its solder pads and components. It is placed on a blue fabric surface next to a metal ruler.	 A photograph of a CR2477 3V Lithium Cell battery. The battery is circular with a silver top and a black bottom. It is placed on a blue fabric surface next to a metal ruler.
