

# User Guide

## **Product Overview**

jjPlus QST015B is a Qi compatible wireless charger designed for charging mobile phones through thin non-metallic solid materials such as wood, plastic, glass, and granite. It can support 5W Qi BPP standard, and 7.5W Apple fast charging.

## **Packaging Contents**

Item	Quantity
QST015B wireless charger	1
QST015B associated tray	1
Cardboard (setup tool)	1
Magnet (setup tool)	3
Power adaptor	1
Manual	1

## **Installation guide**

- Define the desired charging area on a thin solid material. Put the magnet at the center of the desired charging area.
- Align the associated tray with the setup tool under the solid material.

- Insert the charger onto the tray. So, the charging area of the charger is well within the defined area on the thin solid material.

- Connect the power adaptor to the wireless charger. The LED color should be blue and blinking, which means the wireless charger is at normal standby mode. Place the mobile phone in the center of the charging area, the phone will start charging.

## **Frequency**

Magnetic field frequency: 100-148 KHz

### **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

### **Industry Canada Statement**

This device complies with Industry Canada licence-exempt RSS standard.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
