TAIWAN

MODEL : P070D-A02-7 1.2T  
DATE : 2008.11.12  
MADE IN KOREA  
BIGSON CO.,LTD

Multi-chip module containing several integrated circuits, including two labeled 'ELPIDA' and others with part numbers like 'HM2000 REV.1.2' and 'K9F120800A'.

Large silver component, likely a memory module or a specialized IC, with multiple pins and a complex internal structure.

Power regulation section featuring several electrolytic capacitors (e.g., F330, D22), a transformer, and other passive components.

Another multi-chip module, featuring a chip labeled 'BA7786FP 793 HV2 Y' and other smaller components.

Capacitor bank consisting of several electrolytic capacitors, including one labeled 'T01' and others with values like '100 165' and '100 162'.

Bottom right section of the board with various components, including a chip labeled '100-16 R4', a transformer, and other small components.
