Plots for the test equipment (EUT) – Sweep frequency span

Plots for the test equipment (EUT) – Signal sweep frequency time and cycle time

Signal sweep frequency time $T_S = M2 - M1$; $T_S = M4 - M3$
 Cycle time = $M3 - M1$
 Worst case
 $T_S = 41.5841$ msec
 Cycle time = 70.1916 msec

Plots for the test equipment (EUT) – Measured 20 dB Bandwidth 85,2 MHz
