Dear Sir or Madam:

We, Coulomb Technologies Inc., hereby declare that the product: *Electric Vehicle Charge Station, CT2000* is electrically identical with the same electromagnetic emissions and electromagnetic compatibility characteristics as CT2100 tested by BACL project number: R1008093.

Descriptions of the differences between the tested model and those that are declared similar are as follows:

The following options are built-in to the CT2100 and are not in CT2000;

- CT2100 has Door solenoids & support circuitry which allow Level 1 charging (120VAC).
- CT2100 has a Safety Supervisory module circuitry for Level 1 charging on the Combo Board which is not present on the CT2000.

These are the Mechanical Changes and Circuitry differences between CT2100 and CT2000.

Please contact me should there be need for any additional clarification or information.

Best Regards,

Gary Eldridge, P.E.
