FCC ID: W92VULINK

Attestation regarding beam-forming and external phase locking

Vubiq attests that the above referenced device will not be fitted with an external RF input to allow multiple units to be phase locked to a single source to facilitate "beam forming". (Locking multiple units to a single reference and transmitting the same information)

if such a modification is desired in the future, Vubiq will seek the necessary certification(s).

Sincerely,

Signed:

A handwritten signature in black ink, appearing to read 'David Waitt'.

David Waitt
