

Set up VoIP Service

This feature allows you to make phone calls over the WiMAX connection. Just simply plug the phone handset to the VoIP port on the modem, and it is ready.

Step 1 VoIP Service Subscription

Please contact your local service provider for information on VoIP service subscription.

Step 2 Connect your phone

Connect one end of the phone Cable (RJ-11) to the Phone Port of the modem and the other end to the phone.

Step 3 Use VoIP Service

Once the telephone set is properly connected to the port, you are ready to make phone calls.

When the modem and telephone set are connected with the cord, VoIP LED will light up in blue, and you can use the VoIP service now.

If you have subscribed to VoIP service, and both the modem and phone set have been properly set, but the LED does not work, you can disconnect the cord and try again with different cord or port. If the problem still exists, please contact the service provider for technical support.

LED Light Indication

| | | | | |
|----------------|--|------|----------|---|

| Phone 2 Status | | Blue | ON | Phone Service registered and ready |
| | | | Blinking | Off-hook / Ringing / Busy |
| | | | OFF | Phone Service not registered / disabled |

Claim FCC Regulations to DX-250

FCC Regulations

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

- This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.
