

# **MPE TEST REPORT**

Applicant	Green Packet Berhad, Taiwan			
FCC ID	W9V-OT235-GP			
Product	LTE CPE			
Brand	GreenPacket			
Model	OT-235			
Report No.	R1905A0259-M1			
Issue Date	August 7, 2019			

TA Technology (Shanghai) Co., Ltd. tested the above equipment in accordance with the requirements in **FCC 47 CFR Part 1 1.1310**. The test results show that the equipment tested is capable of demonstrating compliance with the requirements as documented in this report.

### 1.1 Notes of the Test Report

This report shall not be reproduced in full or partial, without the written approval of **TA technology** (shanghai) co., Ltd. The results documented in this report apply only to the tested sample, under the conditions and modes of operation as described herein .Measurement Uncertainties were not taken into account and are published for informational purposes only. This report is written to support regulatory compliance of the applicable standards stated above.

## 1.2 Test facility

#### CNAS (accreditation number:L2264)

TA Technology (Shanghai) Co., Ltd. has obtained the accreditation of China National Accreditation Service for Conformity Assessment (CNAS).

#### FCC (Designation number: CN1179, Test Firm Registration Number: 446626)

TA Technology (Shanghai) Co., Ltd. has been listed on the US Federal Communications Commission list of test facilities recognized to perform electromagnetic emissions measurements.

#### IC (recognition number is 8510A)

TA Technology (Shanghai) Co., Ltd. has been listed by industry Canada to perform electromagnetic emission measurement.

#### VCCI (recognition number is C-4595, T-2154, R-4113, G-10766)

TA Technology (Shanghai) Co., Ltd. has been listed by industry Japan to perform electromagnetic emission measurement.

#### A2LA (Certificate Number: 3857.01)

TA Technology (Shanghai) Co., Ltd. has been listed by American Association for Laboratory Accreditation to perform electromagnetic emission measurement.

## MP

## 1.3 Testing Location

Company:	TA Technology (Shanghai) Co., Ltd.
Address:	No.145, Jintang Rd, Tangzhen Industry Park, Pudong Shanghai, China
City:	Shanghai
Post code:	201201
Country:	P. R. China
Contact:	Xu Kai
Telephone:	+86-021-50791141/2/3
Fax:	+86-021-50791141/2/3-8000
Website:	http://www.ta-shanghai.com
E-mail:	xukai@ta-shanghai.com

## 1.4 Laboratory Environment

TemperatureMin. = 18°C, Max. = 25 °C			
Relative humidity	Min. = 30%, Max. = 70%		
Ground system resistance < 0.5			
Ambient noise is checked and found very low and in compliance with requirement of standards. Reflection of surrounding objects is minimized and in compliance with requirement of standards.			

#### **Description of Equipment under Test** 2

#### **Client Information**

Applicant	Green Packet Berhad, Taiwan		
Applicant address2F, No. 23, Lane 583, Rueiguang Road, Neihu District, Taipei 11492 Taiwan, ROC			
Manufacturer	Green Packet Berhad, Taiwan		
Manufacturer address	2F, No. 23, Lane 583, Rueiguang Road, Neihu District, Taipei City 11492 Taiwan, ROC		

#### **General Technologies**

Model	OT-235	
SN	ZMOT235191200004	
Hardware Version	V1.0	
Software Version	MH-39357-2.0.3-Choice-R1-20190201	
Date of Testing:	April 23, 2019~ August 7, 2019	

## 3 Maximum conducted output power (measured) and antenna Gain

The numeric gain (G) of the antenna with a gain specified in dB is determined by Numeric gain (G)=10^(antenna gain/10)

Band	Maximum Conducted Output Power (dBm)		Antenna Gain (dBi)	Numeric gain
	(dBm)	(mW)		
LTE Band 43	15.500	35.481	8.600	7.244
LTE Band 48	15.500	35.481	8.600	7.244

## 4 Test Result

According to section 1.1310 of FCC 47 CFR Part 1, limits for maximum permissible exposure

(MPE) are as following

Frequency Range	Electric Field	Electric Field Magnetic Field		Averaging Time	
(MHz)	Strength	Strength			
1010	(V/m)	(A/m)	(mVV/cm2)	(minutes)	
	(A) Limits for Occu	upational/Controlle	d Exposures		
0.3-3.0	614	1.63	*(100)	6	
3-30	1842/f	4.89/f	*(900/f2)	6	
30-300	61.4	0.163	1.0	6	
300-1500			f/300	6	
1500-100,000			5	6	
(B)	Limits for General	Population/Uncont	rolled Exposure		
0.3-1.34	614	1.63	*(100)	30	
1.34-30	824/f	2.19/f	*(180/f2)	30	
30-300	27.5	0.073	0.2	30	
300-1500			f/1500	30	
1500-100,000			1.0	30	

TABLE 1 - LIMITS FOR MAXIMUN PERMISSIBLE EXPO	SURE (MPE)
---	------------

f = frequency in MHz

\* = Plane-wave equivalent power density

- Note1. Occupational/controlled limits apply in situations in which persons are exposed as a consequence of their employment provided those persons are fully aware of the potential for exposure and can exercise control over their exposure. Limits for occupational/controlled exposure also apply in situations when an individual is transient through a location where occupational / controlled limits apply provided he or she is made aware of the potential for exposure.
- Note2: General population/uncontrolled exposures apply in situations in which the general public may be exposed, or in which persons that are exposed as a consequence of their employment may not be fully aware of the potential for exposure or can not exercise control over their exposure.

The maximum permissible exposure for 1500~100,000MHz is 1.0.So

Band	The maximum permissible exposure	
LTE Band 43	1.0mW/cm <sup>2</sup>	
LTE Band 48	1.0mW/cm <sup>2</sup>	

#### **RF Exposure Calculations:**

The following information provides the minimum separation distance for the highest gain antenna

provided. This calculation is based on the conducted power, considering maximum power and antenna

gain. The formula shown in KDB 447498 D01 is used in the calculation.

Equation from KDB 447498 D01 General RF Exposure Guidance v06 (10/23/2015) is:

## $S = PG / 4 \prod R^2$

Where: S = power density (in appropriate units, e.g. mW/cm<sup>2</sup>)

P = Time-average maximum tune up procedure (in appropriate units, e.g., mW)

G = the numeric gain of the antenna

R = distance to the center of radiation of the antenna (20 cm = limit for MPE)

Band	PG (mW)	Test Result (mW/cm <sup>2</sup> )	Limit Value (mW/cm <sup>2</sup> )	Conclusion
LTE Band 43	257.040	0.051	1.000	Pass
LTE Band 48	257.040	0.051	1.000	Pass
Note: <b>R</b> = 20cm				
∏= 3.1416				

Note: For transmitters, minimum separation distance is 20cm, even if calculations indicate MPE distance is less.
