Re.: Confidentiality Request FCC ID: W9Z-PHOENIXG2

Equipment: FCC: W9Z-PHOENIXG2; IC: 8855A-PHOENIXG2

To Whom It May Concern:

This letter serves as an official request for confidentiality status under sections 0.457 and 0.459 of CFR 47. We have requested that the following listed items, which are required to be submitted with this application, be permanently withheld from public review.

Schematics
Block Diagram
Operational Description
Internal Photos
Parts list
Tune up procedure

The material for which confidentiality is sought is employed in the design and manufacture of this transmitting equipment that is offered on a highly competitive basis. Customers for this equipment have a variety of competing sources. Disclosure would, in effect, give away the fruits of the labors of SAF Tehnika AS engineering personnel, who have designed the equipment and the manufacturing process. Disclosure would also offer competitors additional unwarranted insight into the state of the product development, thereby allowing competitors an advantage, not available to SAF Tehnika AS.

Internal photos should be held confidential for a permanent amount of time. The device is sealed, and disassembly would destroy the product. The device will not be accessible by general public and is only serviceable by SAF Tehnika AS or authorized representatives directly. Releasing internal photos will reveal company secrets and take away any competitive advantage in the market.

Please contact me if there is any information you may need.

Sincerely,

Aivis Danovskis
Product manager
SAF Tehnika AS
