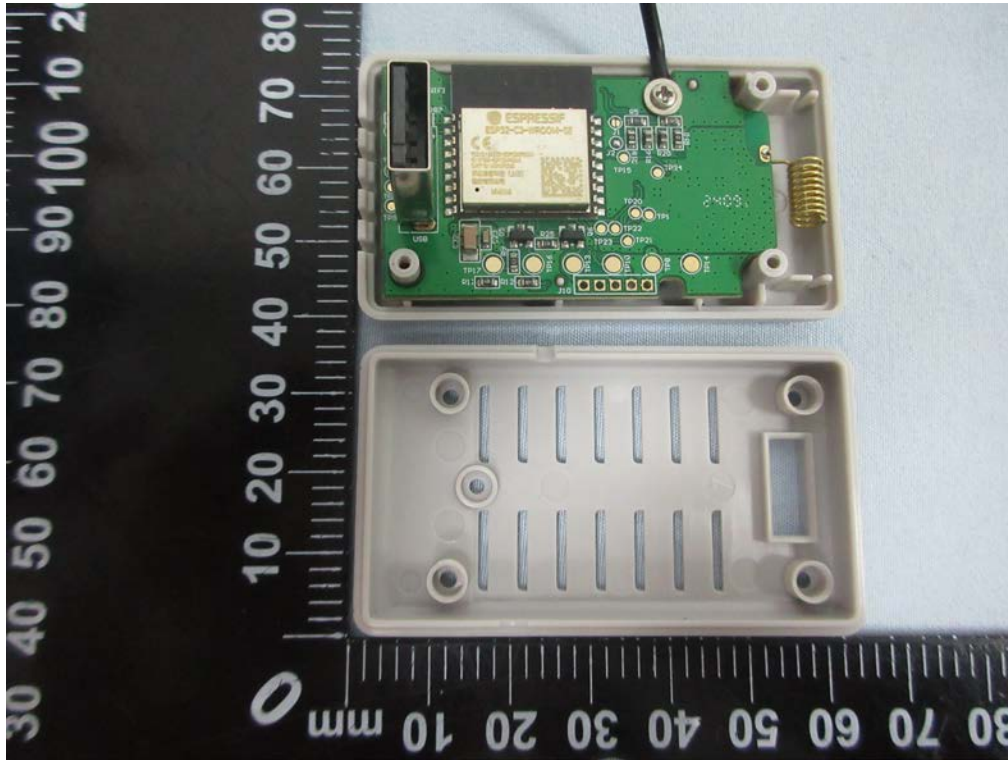

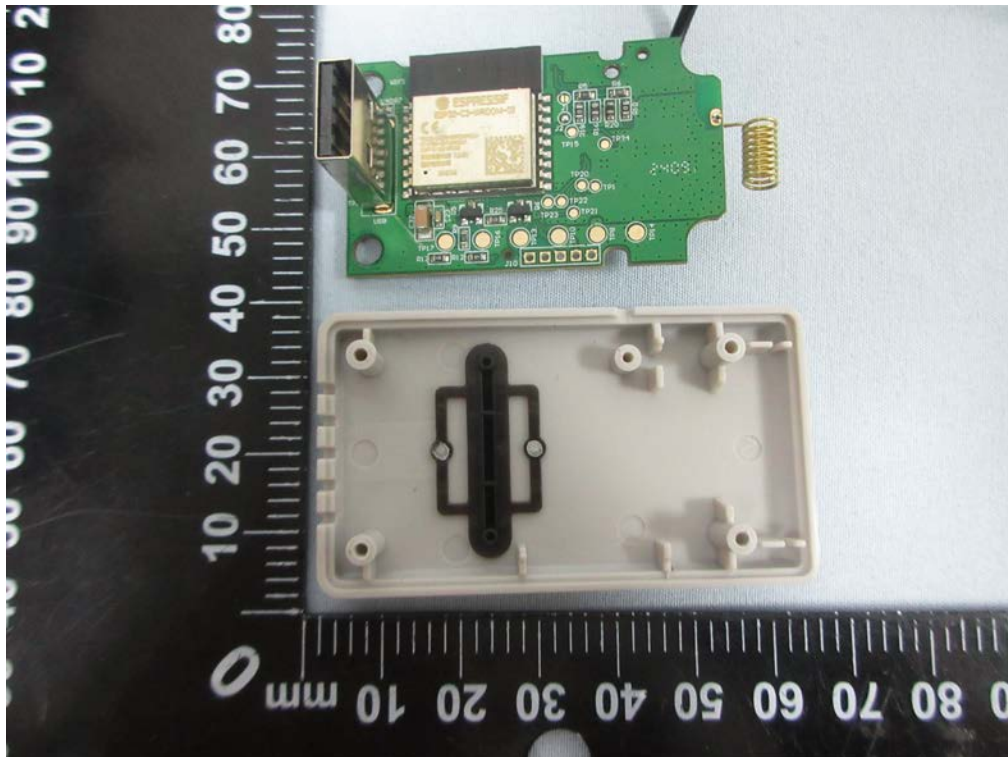

Photo 2

A photograph of a green printed circuit board (PCB) module, likely an ESP8266-based development board. The module features a gold-plated USB connector on the left side, a black integrated circuit (IC) in the center, and a gold-colored antenna on the right. Various surface components like resistors and capacitors are visible. The module is placed on a white surface next to a black ruler with white markings, indicating its size. The ruler shows measurements in millimeters (0 to 60 mm) and centimeters (10 to 50 cm).
