**Overall Assessment Letter for verykool USA Inc. i410  
FCC id: WA6I410**

I have reviewed this application and find it compliant. This is an application for a mobile phone supporting GSM/GPRS 850/1900 and Bluetooth. The phone additionally supports GSM/GPRS 900/1800; however these bands are not applicable as they are not operational in North America.

As a result of the assessment review the user manual was updated to include Part 15 and RF exposure related regulatory statements. A block diagram was re-submitted and the internal photo exhibit was updated to show the internal construction/chassis assembly as well as the separation distance between the GSM and BT antennas. A tune-up procedure was supplied, which originally was not provided. The operational description was updated to state the GPRS Multi-slot class as well as additional exhibits received related to the BT and GSM antenna details.

I underwent the FCC RF exposure evaluation training at BABT in July 2007.

Yours sincerely
