i725
User Manual

**Thank you for purchasing the i725 mobile phone**

Introduction

Welcome to choose the i725 mobile phone. This user manual states the outstanding performance of the i725 mobile phone in detail. In addition to the basic call features, the i725 mobile phone and the system network also provide you with a variety of useful features and services to facilitate your work and leisure activities.

The Company reserves the right to make any amendment on the technical specifications without any advance notice.

Reading Statement for the Manual

In manual, different typesetting styles are used to interpret different operating details, and the specific interpretation is as follows:

Operation	Description of Contents	Example
Showing contents	Show with normal characters	0-9
General key	All the keys except functional keys are shown by normal characters with frames	0-9
Functional key	Functional key is shown with bold and frame	OK
Menu item	Show in bold italics	**Hold a call**

Note:

The picture shown in the manual are only used as function hint pictures which may be different from the ones shown in the mobile phone, and the ones in your mobile phone shall prevail.

CONTENT

III

Security and performance

◆To touch the screen of the mobile phone with sharp articles is prohibited. Dust particles and nails may scratch the screen. Please maintain the screen clean. Please remove the dust on the screen with soft cloth gently, so as not to scratch the screen.

◆In thunder raining days, please do not use the mobile phone when charge it or outdoor, so as to avoid being struck by thunder or other injuries.

◆Please do not put the battery in high-temperature environment (high temperature will lead to heat of the battery upgrading), or else it may result in fire or explosion.

◆Please keep the mobile phone being charged and the charger away from people or other flammable and explosive articles in order to avoid fire, explosion or other dangers!

◆Please strictly adhered to the rules and do shut down the mobile phone on occasions which use of mobile phone is prohibited!

Please do not put the mobile phone, battery and charger in the equipment with strong electromagnetic field, such as induction cooker and microwave oven; otherwise it will lead to circuit failure, fire or explosion.

◆Please do not arbitrarily refit the mobile phone, or teardown the mobile phone and accessories without authorization. Improper refitting or teardown easily triggers fire and explosion of the mobile phone. Only the authorized organizations can repair the mobile phone.

◆Please do not use batteries, charger or accessories of non-standard original models.

◆Please do not join the two poles of the battery, so as not to result in battery short-circuit.

◆If the power wire has been damaged (such as the exposed and fractured), or the connector has been loosened, please don't use it, so as to avoid electric shock, short circuit of the charger or fire.

◆The mobile phone should be powered off in the hospital or other

places where use of mobile phone is prohibited. Mobile phone will affect proper work of electronic equipment and medical devices, such as pacemakers, hearing aids and other medical electronic equipments. Pacemaker manufacturer proposes to keep the distance between the mobile phone and the pacemaker at least 15 cm, in order to avoid potential interference to the pacemaker by the mobile phone.

◆Please do not uses the mobile phone when drive a car. In case of emergency, please use hand-free devices (which may be bought separately); otherwise, please park your car on the road side before making a call.

◆Please do not put the mobile phone on car insurance airbag or region reachable by the airbag after spreading. Otherwise when the airbag expands or ruptures, the mobile phone is likely to cause serious damage to the people in the car due to strong external force.

◆Please keep the mobile phone, battery and charger at place out of the reach of children. Please do not let children use the mobile phone, battery and charger in the absence of adults' supervision.

◆In order to comply with provisions of RF leakage, when you wear a mobile phone or use the data functions of the mobile phone, please maintain the distance between the antenna and the body at least 1 inch (2.5 centimeters).

◆Please power off the mobile phone before cleaning and maintenance. If the mobile phone is connected to the charger, you need to unplug the charger from the power outlet, and disconnect the connection between the charger and the mobile phone in order to avoid electric shock, short circuit of battery or charger.

◆Do not use chemical lotion, scrubbing cleanser to wipe the mobile phone or the charger, otherwise it may damage the components or cause fire. Slightly wet and anti-static soft clean cloth can be used.

◆Please do not throw the old and abandoned lithium batteries into trash can, send them to the designated locations or return them to

our company.

◆Please do not charge the mobile phone in environment with much dust, humidity, too high, or too low temperature (the permitted charging temperature range is 0℃~ 40℃), and the power wire cannot be nearby the heating containers.

◆Please do not use the phone to make bold to camera, video and recording that may infract the rights of the copyright owners.

The company will not be responsible for any losses caused by not recording, deleting, destructing or damage of the photos, video and recordings caused by its accessories or software on the use of the functions including camera, video and audio.

◆In the use of network function, if the users download a file with virus, which make the mobile phone cannot be used normally; the company does not undertake any responsibility arising therefore.

Warning: The original manufacturer will not take on any responsibility for the users who are not in compliance with the above advices or improperly use the mobile phone.

Note: The application of value-added services of the mobile phone is provided by relevant service providers. Please refer to the relevant help or providers' notes for detailed information.

Statement: The Company reserves the right to improve the product without making any advance notice, and keeps final interpreting rights on the product performance. The company commits to improve the product quality and gradually launches new versions of products. So if the contents stated in the manual are slightly different from the function, specification or design, please refer to the mobile phone. Such changes are not notified additionally, your understanding is appreciated.

1 Start Using

1.1 Battery

The battery is attached with the mobile phone. The battery is not charged when the mobile phone is purchased but can support powering on. Please recharge it for use after complete using up the battery for the first three times, which makes this battery easier to achieve the best using state.

1.1.1 Uninstallation and installation of battery

■ Put the back of the mobile phone upward; release the bolts first then take off the rear cover according to the chat below.
■ Dig out the bottom of the battery and get the battery out.

■ When installing the battery, insert the metal teeth at the top of the

battery into corresponding slot of the mobile phone, and then press the battery down to install the battery in place. The battery must be ensured to be installed before powering on.

■ Finally install the rear cover and fix the bolts of the mobile phone.

1.1.2   Charging the battery

When the power of the battery was lower than normal, the phone will prompt battery low. Please charge for the battery, otherwise you will lose the files which not saved. If you don't charge for a long time, the phone will be powered off automatically.

When charging, the battery icon at the right upper corner of the screen will appear in a dynamic rolling manner. During the charging period, the battery, mobile phone and charger will become hot, which is a normal phenomenon.

Warning:

The stated charging temperature ranges from 0℃ to 40℃. Please do not use charging equipment if the temperature exceeds the range. Please do use the charger provided by the supplier. Application of unauthorized charger may trigger danger and breach the mobile phone maintenance warranty.

1.1.3   Use of battery

In actual use, the standby time and talk time of the mobile phone varies with the network status, working environment and different using manners.

1.2   Side sliding keypad

Your mobile is assembled with a side sliding keypad. In order to open side keypad, you could slide the touch screen forward. When the side sliding keypad is open, the screen will enter into horizontal from vertical.

Fn key: The key is used for inputting the special character impressed on the right upper side of one key. Short press the key once, and press the key with special character impressed on the right upper side, the special character will be typed in once. For

5
inputting special characters continuously, please press **Fn** key twice. Press **Fn** key then to go back to normal inputting mode.

⇧ key: Long press the key to switch between Chinese and English input method; short press the key to switch the detailed input method in Chinese or English mode.

1.3 SIM card

Your network operator will provide you a SIM card which is the key for your access to the digital GSM network. **Prior to use the phone, you need to insert effective SIM card in the mobile phone.**

All relevant information concerning network connection will be recorded in the SIM card. SIM card can be removed from your mobile phone and be used in any other GSM mobile phone (new mobile phone automatically read SIM card).

In order to prevent loss and damage to the information in the card, you should avoid touching the metal area and keep it away from electricity and magnetic places. SIM card once being damaged, you will not be registered to the GSM network.

Warning:

You must power off the mobile phone before removing the SIM card. Inserting or removing the SIM card is absolutely prohibited when the external power supply is connected,

otherwise SIM card and mobile phone may be damaged.

1.3.1   Insertion of SIM card

■ Power off the mobile phone, remove the rear cover and battery.

■ Insert the SIM card correctly in the card slot; finally install the rear cover and battery of the mobile phone.

1.3.2   Unlock the SIM card

In order to prevent illegal use, SIM card adopts PIN code (personal identification code) encryption protection.

If this function is selected, PIN code should be input correctly each time when you power on the mobile phone, thus to unlock the SIM card for normal use. Users can disarm the SIM card protection but illegal use of the SIM card cannot be prevented.

If the PIN code input is error for three consecutive times, your SIM card will be locked by the network. The mobile phone will enquire the PUK code which will be provided by your network operator. If the PUK code input is wrong for 10 times, the SIM card will be permanently barred.

Note:

Your network operator will set a standard PIN code (4 to 8 numbers) for you and you should change it to private password as soon as possible.

7

1.4 Plug and unplug the Memory card
■ Remove the rear cover and battery.
■ Insert the memory card into the slot at the bottom according to the chat below.

1.5 Plug and unplug the earphone
Open the USB cover and insert the connector of the earphone to the earphone jack at the right side of the mobile phone. Gently pull out the earphone to remove it.

1.6 Status bar and content
In standby screen you can get the information that you need from the indication icons on the screen.

	Indicating the current signal strength of SIM1
	Indicating that the SIM1 is connecting network currently
	Indicating there is text message not read of SIM1 and SIM 2
	Indicating there is MMS sending or downloading of SIM 1
	Indicating there is MMS not read of SIM 1

	Divert all voice calls has been set of SIM1
	Indicating missed call of SIM1 and SIM 2
	The current alert type is ring only
	The current alert type is vib. only
	The current alert type is vib. and ring
	The current alert type is vib. then ring
	Indicating that silent mode activated
	The mobile phone is locked
	Indicating that earphone has been inserted
	Indicating that the Bluetooth has been activated
	Alarm has been set
	Indicating current battery capacity

1.6.1 Keys

9

Functions of the keys are described as following:

SN	Keys	Function description
1	Send key (Snd)	Making a call; in dual SIM mode, press Snd key to select the SIM card for dialing out; answering a call; in the standby screen press the Snd key to enter the Dialer screen.
2	End key	Hang up a call; go back to the standby screen.
3	Menu key	Short press to enter the main menu screen in standby mode; Active detail menu in other program screen.
4	OK key	OK; enter the selected menu.

The meanings of icons are described as below.

Sym	Enter Symbol interface		Switch English/ Chinese input method
	Hide the virtual keypad		Delete
	Switch Capital/Lower-case in English mode		Switch to next line
	Hand	123	Numeric

2 Dial and answer the call

2.1 Making a call

When the network operator's logo appears on the screen, the mobile phone enters into the normal standby state in which you can dial or answer a call. The network signal strength indicator shows at the top of the screen. The call quality is relatively largely impacted by obstacles. Therefore, movement in a small range can effectively improve the signal strength.

2.1.1 Direct dial

Making domestic call

In the standby screen, press **Snd** key or choose "Dialer", enter into Dialer screen. Input the call numbers (please add the area code for domestic long-distance calls).If there are matched contacts, you can choose the contact directly. Then click "SIM1/2 Call" in the downside menu or press the **Snd** key to select SIM1 or SIM2 to make the call. In single SIM mode, click "Call" in the downside menu or press the **Snd** key will call out directly.

Calling extension of fixed number

When calling the extension number of a fixed number, you need to dial the host number and then dial the extension number according to the corresponding voice hints. If you insert "p" between the host number and extension number, the mobile phone will automatically dial the extension number for you.

12

Note:

In the dial screen, long press " * "to input " P "; long press " 0 "to input " + "; long press" # " to input " W ".

Making an international call

To make an international call, you simply need to input the symbol "+", then input the country code and complete phone number that you want to dial.

2.1.2　　　Making a call from the Phonebook list

In the Phonebook list, select corresponding contact person and phone number, press the number directly or press Menu key, choose SIM to dial. You could also long press the number in contact detail message interface and then choose "Call" to dial.

2.1.3　　　Speed dial

In Speed dial, you can separately set number keys 2-9 to set up phone numbers.

On the dial screen, long press the number keys and you can automatically dial the number that has been set up. If speed dial has not been set for the number key you long pressed, the mobile phone will hint you "No speed dial number".

2.2　Answering a call

2.2.1　　　Answering new call

If there is a new incoming call when in call progress, the mobile phone will pop up caller screen (call waiting is activated) and the mobile phone will give a short prompt to tell you that you have a new call. At this time, you can press Snd key or activate **Answer** to answer the new call. When you answer a new call, the original call will enter holding status. At this time, you can activate Menu to select **Swap** to the original call, and the new call will enter holding status.

Note:

When you are in call progress, the new call to another SIM card can't be dialed in.

2.2.2   Connecting two calls at the same time

When two telephone numbers are connected, you can operate as follows:

H-Free: switch the call to loud speaker mode.

DialPad: press to enter Dialpad.

End call: hang up the current call.

Call Conference: when making conference call, you can have a talk separately with designated conference participant.

Swap: switch activated call.

Background sound: enter into call background sound setting interface.

Mute: mute the current call, the other side could not hear what you say.

Sound recorder: record the current call.

Note: enter into Note editing interface.

Phonebook: press to enter Phonebook.

Messages: edit the message to send it.

Call log: enter call history screen.

2.2.3   Conference call

During the conference call, you also can operate as follows:

Hold call: hold the current call with members of the conference, then others cannot hear your voice; and the option of **Hold call** changed to **Retrieve call**, select it and you can recover normal conference call.

Split: separate the selected member from the conference call.

2.3   Emergency call

In any country using the digital GSM network, if you are in the network coverage area (you can check the network signal strength at the top of mobile phone screen), even without the SIM card, you are also able to make an emergency call.

Inputting the PIN code or unlock the phone unlocking screen, press **SOS** and you can make an emergency call.

Note:

The emergency call numbers in different countries or regions are different. Please refer to the local numbers for specific emergency service numbers.

3 Menu operation

The function menu is composed of main menu and free-style menu two modules. The phone will enter free-style menu automatically. Press **Menu** key, enter into main menu. In each interface, you can scroll the screen to the right/left side to switch pages.

7 Common Questions

The mobile phone cannot be powered on

■ The mobile phone cannot be powered on since the battery voltage is too low. Please recharge the battery.

Unable to make some calls

■ Call barring has been set and barred utilization of the mobile phone. Please check and cancel call barring.

Other person is answering my call

■ The mobile phone has been set into divert your calls to another phone number. Please check and cancel call divert.

The mobile phone cannot search for the network

■ The mobile phone is outside of the network coverage area (or there are physical obstructions between the mobile phone and the transmitter), and calls cannot be made or answered. If you are in one room, please move close to the window.

In the operation process, the mobile phone may display the following operating tips:

"**Please Insert SIM**"

■ You must insert the SIM card before using the mobile phone. If the SIM card has been inserted, please get it out and wipe clean with a dry cloth on the golden region, and then insert the SIM card.

"**Emergency**"

■ You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

"**Invalid SIM**"

■ The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

"**Please Enter PUK**"

■ The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK code for ten consecutive times and you must apply for a new SIM card from your network provider.

10 Maintenance Guideline

Welcome to use i725. If there is a problem when you using the mobile phone, please contact with the vender or consult the local maintenance center. If your mobile phone is in need of repair, you can take your mobile phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.

Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may

not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information

This wireless phone meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR, The SAR limit set by the FCC is 1.6 W/Kg.
