- Getting started
 Brief introduction
 Welcome to use this Bluetooth car kit BTC009. It adopts echo cancellation technology and provides high-level sound quality. At the same time it offers easy to use hands-free functions. Please read this user manual carefully before using it.
- 2. Overview

- 3. Installation
 1) Insert the car kit into your car's cigarette lighter socket;
 2) Align microphone and speaker so that they face the driver without any barriers that might reduce conversation quality;

 Using the car kit
 Pairing with a Bluetooth cell phone
 Please make sure your cell phone is Bluetooth-enabled. Specific pairing steps may vary with different cell phones. Please refer to your cell phone's user manual for further information. The pairing steps are as follows:

- 1) Insert the car kit into your car's cigarette lighter socket;
- 2) Make sure your car kit is off, otherwise turn off the car kit first (please refer to "turning the car of /off"); 3) Press and hold the red button for 7-8 seconds and release it when
- the red and blue LEDs flash alternately. The car kit entered pairing mode;
- 4) Switch on your cell phone's Bluetooth function and search for Bluetooth devices. After the search has been completed, select "BTC009" from the Bluetooth device list.
- 5) According to indication, enter password or PIN No:"0000" and press "Yes" or "confirm";
 6) After successful pairing, select "BTC009" from the Bluetooth device list and press "connect". The blue LED will flash once every 5 seconds when the connection is established.

Remarks:

- ◆ Pairing mode will last 2 minutes. The car kit will exit pairing mode automatically if it can't be connected to any device within 2 minutes. If you want to continue to pair the car kit with a Bluetooth device, please turn it off first and re-pair according to steps 1-6 mentioned above.
- After successful pairing the car kit and your cell phone will remember each other. The devices don't have to be re-paired at next use unless the pairing information is deleted because of a new pairing.The car kit can remember 8 paired devices. When the number of paired
- devices exceeds 8, the old ones will be replaced starting with the first.
- Every time you turn on BTC009 it will try to connect to the last connected device automatically. If you want to pair it with another device, please switch off the paired device's Bluetooth function first and pair the car kit with the new device according to steps $1{\simeq}6$ mentioned above.

2. Turning the car kit on/off

Function	Operation	
Turn on the	Press and hold the red 🕤 button for about 3-5 seconds	
car kit	until the blue LED flashes	
Turn off the	Press and hold the red 💿 button for about 3-5 seconds	
car kit	until the red LED flashes	

2
