Welcome to use this Bluetooth headset, BTH069. Please read this user's manual carefully before use.

## ■ Brief introduction

BTH069 is a Bluetooth stereo headset. It is concise, vogue, and easy to operate. You can use it to make a call and listen music wirelessly.

## ■ Before use

### 1. Overview

<b>1</b>	Retractable headband	<b>5</b>	LED indicator
<b>2</b>	Volume up button	<b>6</b>	Micro USB charging jack
<b>3</b>	Volume down button	<b>7</b>	Microphone
<b>4</b>	Multi-functions Button(MFB)		

## 2.Charging for headset

BTH069 comes with a built-in rechargeable battery, prior to using it, it is recommended to charge the battery fully for the first time. When the red LED of headset flashes twice and emits “dong dong” tones every 20 seconds. It means battery low. Please recharge the battery fully.

1. Plug the USB charging cable to the port of PC
2. Plug the USB charging cable into the charging jack of the headset  
Red light on: Charging  
Red light off: Finish charging
3. It will takes about 2.5 hours to finish charging

### Warning:

- 1) The battery is recyclable.
- 2) Batteries (battery pack or batteries installed) shall not be exposed to excessive heat place such as sunshine, fire or the like.

## ■ Using the headset

### 1. Turning on/off the headset

Functions	Operation	LED indictor	Prompt tone
Turning on	Press and hold MFB button for 4 seconds	Blue LED on for 1 second	“Power on”
Turning off	Press and hold MFB button for 4 seconds	Red LED on for 1 second	“Power off”

**Remark:** In order to save power, the headset will turn off automatically if no devices can be connected after 5 minutes.

## 2. Wearing the headset

The headset is designed as retractable style. Please adjust it according to the actual use. The logo “L” corresponds to the left ear, and the logo “R” corresponds to the right ear. Please wear the headset according to the indicator.

## 3. Pairing/connecting

### 1) How to enter pairing mode

Functions	Operation	LED indicator	Prompt tone
Enter pairing mode	Ensure the headset is off, press and hold MFB button for 8 seconds	Red and blue LED flashes alternately	“DIDI”

**Remarks:** Pairing mode will last 2 minutes, if no devices can be connected over 2 minutes, the headset goes to standby mode automatically.

## **2)Pairing headset with Bluetooth cell phone**

Prior to using the headset for the first time, you have to pair it with a Bluetooth-enabled cell phone.

The general pairing steps are as follows:

- (1)Keep the headset and your Bluetooth cell phone within 1 meter when pairing, the closer the better.
- (2)Make the headset enter into pairing mode.( Please refer to “How to enter pairing mode”.)
- (3)Activate your cell phone’s Bluetooth function and search for Bluetooth devices within range, select “BTH069” from the list of devices shown. After successful connecting, blue LED of headset flashes twice every 5 seconds

### **Remarks:**

- ◆ After successful pairing, the paired devices will remember each other, they will no need to pair next time. The headset will connect with last connected device automatically when you turn it on again.
- ◆ When the headset not connected with device, short press MFB button once, the headset will try to connect with last connected device.
- ◆ After enter pairing mode , the headset would not connect automatically. If you need to pair it with other devices, please pair the headset with new device according to the steps mentioned above.

## **3) Pairing headset with Bluetooth transmitter**

You can connect the headset with a Bluetooth transmitter to enjoy music wirelessly. Hereby take BTT005 for example (not included in accessory).

The pairing steps are as follows:

- (1)Keep the headset and Bluetooth transmitter within 1 meter when pairing, the closer the better.
- (2)Make the headset enter pairing mode.(Please refer to “How to enter pairing mode”.)
- (3)Turn on the Bluetooth transmitter and make it enter pairing mode. It will search for Bluetooth devices automatically and send a pairing request; After successful pairing and connecting, blue LED of the headset flashes twice every 5 seconds.

## Remarks:

- ◆ The pairing password of the headset is “0000”. So, the headset can only pair with a Bluetooth transmitter whose pairing password is “0000”. The headset does not support the Bluetooth transmitter whose pairing password is not “0000”.
- ◆ After successful pairing, the paired devices will remember each other, they will no need to pair next time. The headset will connect with last connected device automatically when you turn it on again.
- ◆ If you fail to pair for many times, please read the user’s manual of Bluetooth transmitter carefully.

**7. Factory Reset**

In the status of turning off, long press MFB button and volume up button (or volume down button) about 10 seconds and release it until the LED not flashes.

**Remarks:**

After factory reset, the paired list of headset will be deleted. After turn it on again, the headset will enter pairing mode automatically, and you need to re-pair and connect with Bluetooth devices.

## ■ Care and maintenance

Read the following recommendations carefully before using BTH069. Following these you will be able to enjoy this product for many years.

- ◆ Keep it dry and don't put it in the damp place to avoid the product's internal circuit being affected.
- ◆ Keep the product away from direct sunlight or hot places. High temperatures will shorten the life of electronic devices, destroy the battery or distort certain plastic part.
- ◆ Don't expose the product to cold areas. It may damage the internal circuit board.
- ◆ Don't try to disassemble the product as it may get damaged if you are not professional.
- ◆ Don't let it fall down onto the floor or other hard surfaces. The internal circuit might get damaged.
- ◆ Don't use intensive chemical products or detergent to clean the product.
- ◆ Don't scratch the surface with sharp things. It may get damaged by sweat.

In case the product doesn't function properly, send it to the store you bought it. The staff will help you to solve the problem

## ■ FAQs

### **1. What does it mean when red LED flashes twice every 20 seconds?**

Battery is low power, need to be recharged.
