Packing List

Make sure you have everything you need to properly configure the device.

IDU	Power supply	Ethernet cable

2

Configure Hardware

Insert SIM Card

⚠ If you want to remove the SIM card, please lightly press the SIM card, the SIM card will pop out. Make sure the CPE is turned off before you insert or remove your SIM card. Otherwise, the CPE and SIM card may be damaged.

Please insert your SIM card (3FF) as following:

How does it Work

⚡ The figure is just for reference only, please connect according to your requirements.

3

Step 1 Connect the supplied power adapter to the CPE.

Step 2 Connect other devices.

- You can connect your computer or classic Switch via Ethernet cable to LAN port.
- You can connect your laptop via Wi-Fi.

⚡ When you are using the CPE, you can adjust the position and direction of CPE to get stronger LTE signal, you can judge from the LTE signal LED indicators.

LED Indicators

When set up the CP860, you will see the following LED indicators:

Indicator	Status	Description
POWER	Steady on	Power On
	Off	No Power Supply
INTERNET	Steady on	Internet Available
	Off	Internet Unavailable
	Blinking (500ms interval)	Searching network of LTE
5G WIFI	Steady on	5G WiFi Available
	Off	5G WiFi unavailable
2.4G WIFI	Steady on	2.4G WiFi Available
	Off	2.4G WiFi unavailable
SIGNAL	Steady on	Display the current LTE network signal, the stronger signal, the more bars on
	Off	No Signal
	Blinking one by one	Firmware upgrade

Configure The CPE

Login to the Website

Use a browser to access the management web page to configure and manage the CPE.

The following procedure describes how to use a computer running Windows 7 or above version and Internet Explorer to connect to the CPE webpage.

Step 1 Connect the CPE correctly.

Step 2 Start Internet Explorer, go to <http://192.168.1.1> in the address bar, and press Enter.

Step 3 Enter the user name (admin) and password (user2008), and click Log In.

You can connect to the management web page after the password is verified.

5

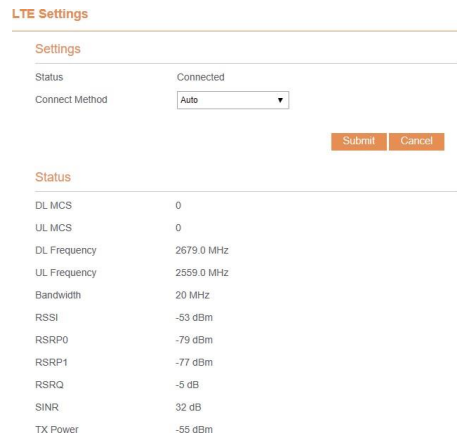

Configuration of LTE

Step 1 Connect the CPE correctly.

Step 2 Enter the management website.

Step 3 Choose Settings → Network → LTE Settings.

Step 4 Set the connection mode and scan mode.

*** The default setting is automatically connection and full band scanning, if you want to connect the LTE network according to your needs, you can set the connection mode as manual, and simply scan a specified band.

6

Configuration of Wi-Fi

Step 1 Connect the CPE correctly.

Step 2 Enter the management website.

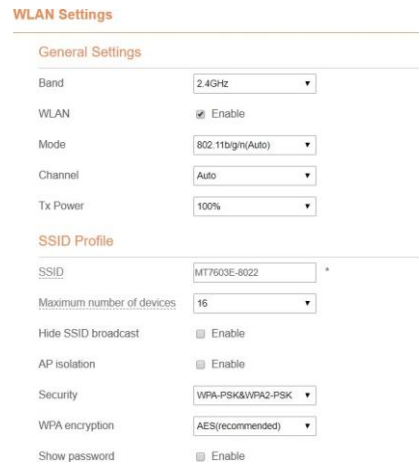

Step 3 Choose Settings → Wi-Fi → WLAN Settings.

Step 4 In the General Settings, set Wi-Fi Enable or enable Wi-Fi with the Wi-Fi button.

Step 5 In the Setting, change the SSID, such as "LTE-Router"

Step 6 To ensure data security, it is recommended that you change the Wi-Fi password by default.

Step 7 Click Submit to save the settings.

7

Troubleshooting

The POWER indicator does not turn on.

- Make sure that the power cable is connected properly and the CPE is powered on.
- Make sure that the power adapter is compatible with the CPE.

Fails to login the web management page.

- Make sure that the CPE is started.
- Verify that the CPE is correctly connected to the computer through Wi-Fi or a network cable.

The CPE fails to search for the wireless network.

- Check that the power adapter is connected properly.
- Check that the CPE is placed in an open area that is far away from obstructions, such as concrete or wooden walls.
- Check that the CPE is placed far away from household electrical appliances that generate strong electromagnetic field, such as microwave ovens, refrigerators, and satellite dishes.

The power adapter of the CPE is overheated.

- The CPE will be overheated after being used for a long time. Therefore, power off the CPE when you are not using it.
- Check that the CPE is properly ventilated and shielded from direct sunlight.

The parameters are restored to default values.

- If the CPE is powered off unexpectedly while being configured, the parameters may be restored to the default settings.
- After configuring the parameters, download the configuration file to quickly restore the CPE to the desired settings.

*** If the problem persists, please contact authorized local service suppliers.
