主旨: Medion AG, FCC ID: WCE-E4440, Assessment NO.: AN09T8984, Notice#1

Hi Amanda,

Please address following issues.

Q#1: According the user manual, this device can connect to PCs with a USB cable for data communication and then that it can be classified as PC peripheral. Per15.101, FCC DOC or certification rule should be followed. Please address.

Be noted that China and USA don't have MRA that testing labs located in China can't issue FCC DOC report. So, if FCC DOC rule is followed, please then provide an updated label format to include FCC DOC logo and also provide an attestation letter issued by grantee to clearly indicate the DOC report was carried by whom with the report number on it.

Ans: FCC DOC LETTER as attachment and the FCC DOC logo is affixed on the bottom side of the EUT.

Q#2: Please provide an updated user manual to include 15.21, 15.105 and RF exposure statements.

Ans: Please have the updated user manual. (please see page 12)

Q#3: Test report indicated two models are listed in this filing,

Ans: Two models are identical except the flash memory.

Q#4: Antenna gain indicated in test report can't match with antenna specification. Please have a check and do the necessary correction.

Ans: Sorry for the confusing, client provided incorrect antenna spec., please have the renewal antenna spec.

Best Regards,  
Lucy Tsai  
CCS

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
