Re: Limited Modular Approval Request - FCC

FCC ID.: WDC-RTAG
Product Name: RTAG

To whom it may concern:

Pursuant to the requirements of DA00-1407 for modular approval of Part 15 devices:

1. The radio module does not require shielding by nature of design. All testing has been performed without testing and the module has been found to comply.
2. The modulation inputs are buffered such that modulation input is limited.
3. The module does not require power regulators external to the transceiver IC(U1) as it has internal linear regulators.
4. The module is certified with specific antennas and these antennas are the only antennas used by the integrator and provided to the user of the end device.
5. The module was tested in a stand-alone configuration.
6. The module contains a label with the FCC ID clearly displayed. The final device assembly contains a label that notifies the user that the device contains the radio module and references the FCC ID number of the module.
7. HME Wireless, Inc. does not sell this module. HME Wireless, Inc. integrates this module into their own devices and are responsible for labeling of the module and final assemblies and for the compliance of the final assembly with CFR 47, 15.249.
8. The module will be used by HME Wireless, Inc. for final assemblies used only in Mobile RF exposure configurations. This filing contains evidence of compliance with RF exposure rules for mobile configuration.
