

## Warnings and Notices

**WARNING:** Changes or modifications not expressly approved by Comprod Communications could void the user's authority to operate the equipment

 **WARNING:** *To satisfy FCC RF exposure requirements for mobile transmitting devices, a separation distance of 66 cm or more should be maintained between the antenna of this device and persons during device operation. To ensure compliance, operations at closer than this distance is not recommended.*

**Notice:**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**Notice:**

“This device has been designed to operate with the antennas listed below, and having a maximum gain of 3.5 dBd or 5.65 dBi. Antennas not included in this list or having a gain greater than 3.5 dBd or 5.65 dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms.”

"To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that required for successful communication
