

FCC ID: WDQ-BRDG

Model: 2GIG- BRDG1-900

The FCC ID: WDQ-BRDG Model: 2GIG-BRDG1-900. Go!Bridge™ IP Communicator provides Internet connectivity between the monitoring service's Central Station and the Go!Control® Panel. It supports automatic firmware updates, provides interactive security services, and increases supervision using signal-forwarding to the Central Station. To communicate wirelessly with the control panel, the WDQ-BRDG uses the Silicon Laboratories Si1001-E-GM2 transceiver.

Linear LLC is submitting to obtain original certification for the WDQ-BRDG.

The reports 2GIG0021, 2GIG0021.1 and 2GIG0021.3 were generated by North West EMC.

The BRDG1-900 is powered from a plug-in power supply.
