1.9 USB connect

Connecting to a computer

Please connect PC with USB cable to your tablet and you will see on your tablet, click this sign and turn on USB storage to connect your device.

1. Connect the Device and computer by Micro USB cable, the reminder column will show the remind information.
2. Click the USB icon, pop up the status with reminder information Show as below picture:

- (1). Click the “USB Connected”. Show as below Picture:

(2). In the pop-up picture, click “Turn on USB storage”; after the connection is successful, the robot icon will turn yellow. Show as below:

Turn off USB storage to disconnect your device with PC.

3. Copy files between your computer and your Android's SD card.

4. After copying finishes, click “Turn off USB storage” to disconnected.

When the device is connected to the computer, please do not play files, in order to avoid adverse effects.

Section Two: System Setting

2.1 Connect to Wi-Fi networks

Turn Wi-Fi on & connect to a Wi-Fi network

If you're adding a Wi-Fi network when first setting up your tablet, Wi-Fi is turned on automatically.

1. Touch **Settings > Wireless & networks > Wi-Fi**.
2. Slide the Wi-Fi switch to the **On** position.

The tablet scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon. If the tablet finds a network that you connected to previously, it connects to it.

3. Touch a network name to see more details or connect to it, and type a password if necessary.

Or, if your Wi-Fi router supports Wi-Fi Protected Setup, touch the WPS icon on your tablet, and then touch the same button on your router.

To modify a network's settings, touch & hold the network name.

Add a Wi-Fi network

You can add a Wi-Fi network so that your tablet will remember it, along with any security credentials, and connect to it automatically when it's in

range. You must also add a Wi-Fi network if the network does not broadcast its name (SSID), or to add a Wi-Fi network when you are out of range.

To join a secured network, you first need to learn security details from the network's administrator.

1. Turn on Wi-Fi, if it's not already on.
2. Touch the Plus icon at the top of the screen.
3. Enter the SSID (name) of the network. If necessary, enter security or other network configuration details.
4. Touch **Save**.

The information about the network is saved. Your tablet will connect to this network automatically the next time you come within range.

Forget a Wi-Fi network

You can make the tablet forget about the details of a Wi-Fi network that you added—for example, if you don't want the tablet to connect to it automatically or if it's a network that you no longer use.

1. Turn on Wi-Fi, if it's not already on.
2. In the Wi-Fi settings screen, touch the name of the network.
3. Touch **Forget** in the dialog that opens.

2.2 Sound setting

Change sound settings

If your tablet has multiple users, each has separate Sound settings.

To customize the sounds your tablet makes, go to **Settings > Device > Sound:**

Volumes set the master volume separately for music, notifications, and alarms. You can still use the physical volume control on the tablet to rise or lower volume of whatever sound is currently playing.

Default notification announces the arrival of notifications unless you specify a different sound in an individual app.

Touch sounds give audible feedback when you touch active icons or buttons on the screen.

Screen lock sound is triggered when you unlock the screen.

2.3 Display setting

To change your tablet's brightness, font sizes, and more, go to **Settings > Device > Display**.

Brightness

Touch and drag the slider to set the brightness or touch **Automatic brightness**.

Touch **OK** to save the setting.

Wallpaper Settings

You can choose a picture to display on the Home Screen, Lock screen, or to both the Home and lock screens. Choose from preloaded wallpaper images or select a photo you have downloaded or taken with the Camera.

1. From a Home screen, touch **Settings** → **Display** → **Wallpaper**.

2. Touch **Home screen**, **Lock screen**, or **Home and lock screens**.

Then Select wallpaper from screen displays the following options: **Gallery**, **Live wallpapers**, and **Wallpapers**.

Gallery: Access the Gallery to select a photo. Touch a photo to select it.

Crop and resize the picture, if desired. Touch **Done** to save the picture as wallpaper. Touch **Cancel** to cancel.

• **Live wallpapers**: Choose from pre-loaded interactive animated wallpapers.

Touch a wallpaper to see an example. If available, touch **Settings** to view options for the selection. Touch **Set wallpaper** to save your choice. Touch

Back to return to the Live wallpapers menu.

• **Wallpapers**: Choose from pre-loaded wallpaper images. Touch an image

to view it. Touch **Set wallpaper** to save it as wallpaper. Touch **Back** to return to the Home screen.

Dormancy time

When the screens in light state a period of time, it will automatically lock to save the power if without any operations.

Font size

This option changes the font size to the largest available. For more fine-grained control over font size, go to **Settings > Display > Font size**.

Touch **Font size** and select a font size.

2.4 Application setting

In the application setting, you can manage the running services and access rights

Management and development only for developer.

Application management

In this setting, it is easy to manage and delete some applications that have been installed.

First, get into the application list, click the **according to sort** buttons to order the alphabet and number; click the **all** menu to scan the running program or programs that provide by a third party software developers.

Chick on an application, you can see the application's relevant information to clear the cache unloads programs, clears the default value or forced to stop operation etc.

Running services

In this setting, you can end and set up some programs that are running Access management.

In this setting, by using the opening or prohibition to manage the applications to access content permissions.

View and control services running on your device.

- 1.** From a Home screen, touch **Apps** → **Settings** → **Application manager**.
- 2.** Touch the **Running** tab. All the applications that are currently running on the device display.
- 3.** Touch **Show cached processes** to display all the cached processes that are running. Touch **Show services in use** to switch back.
- 4.** Touch one of the applications to view application information. The following options display:
 - **Stop**: Stops the application from running on the device. This is usually done prior to uninstalling the application.

2.5 Date & Time setting

In this setting interface, you can set up your system time and series options.

Time setting

You can use automatic time from the network, to choose the time zone, to set specific date and time and display format in time setting.

2.6 Language and input setting

In this setting interface, you can choose the language and keyboard input you want.

Language

Set the language used by your device.

1. From a Home screen, touch **Apps → Settings → Language and input → Language**.
2. Touch a language / locale from the list.

Input method

In here the input methods can be set by users, you can add the words in the dictionary or to delete.

Keyboards and Input Methods

Set the keyboard used by your device.

1. From a Home screen, touch **Apps → Settings → Language and input**.
2. Touch **Default** and select a keyboard.

This keyboard is the only selection available for this device.

3. Touch **Set up input methods**.
4. Touch **Google voice typing** to automatically use Google voice typing.
5. Touch next to Google voice typing. The following options are available:
 - **Choose input languages**: Touch **Automatic** to use the local language or select a language from the list.
 - **Block offensive words**: Enable or disable blocking of recognized offensive words from the results of your voice-input Google searches. When enabled, a check mark appears in the check box.
 - **Download offline speech recognition**: Enable voice input while offline.

Touch the **All** tab to download speech recognition for other languages.

Android keyboard

You can set up automatic capital function of opening or closing.

2.7 Check battery level and usage details

Open **Settings > Device > Battery**.

The list at the bottom of the screen shows the breakdown of battery usage for individual apps and services. Touch a graph for more details. The details screen for some apps includes buttons that allow you to adjust settings affecting power usage, or stop the app completely. Battery status (charging, discharging) and level (as a percentage of fully charged) are displayed at the top of the screen.

The discharge graph shows battery level over time since you last charged the device, and how long you've been running on battery power.

See how much battery power is used for device activities.

1. From a Home screen, touch **Apps → Settings → Battery**.

The battery level displays in percentage. The amount of time the battery was used also displays. Battery usage displays in percentages per application.

2. Touch **Screen** or **Android System** to view how the display and the Android system are affecting battery use.

2.8 Change backup & reset options

If your tablet has multiple users, only the owner can see the backup & reset options.

To view the settings described here, go to **Settings > Backup & reset**.

You can back up settings and other data associated with one or more of your Google Accounts. If you need to replace or factory reset your device, you can restore your data for any accounts that were previously backed up.

These options are available:

Back up my data. If you check this option, a wide variety of your personal data is backed up automatically, including your Wi-Fi passwords, Chrome bookmarks, a list of the apps you've installed on Google Play, the words you've added to the dictionary used by the onscreen keyboard, and most of your customized settings. Some third-party apps may also take advantage of this feature, so you can restore your data if you reinstall an app.

If you uncheck this option, your data stops getting backed up, and any existing backups are deleted from Google servers.

Backup account. Displays the Google Accounts whose information gets backed up. You must sign in with one or more of these accounts on a new or reset device to retrieve the associated information.

To add a new account, touch **Backup account > Add account**.

Automatic restore. Check this option to restore settings and other data when you reinstall an app. This feature requires that you are backing up your data with your Google Account and that the app is using the backup service.

Factory data reset. Touch this option, then **Reset tablet** to erase all your personal data from internal storage, including information about your Google Account, any other accounts, your system and app settings, any downloaded applications, and your music, photos, videos, and other files.

After resetting your tablet, you'll need to re-enter the same information requested when you first set up your tablet. If you've been backing up your data to a Google account, an option during the setup process allows you to restore it.

Some third-party apps also make use of the backup service, so if you reinstall one, its settings and data are restored.

Section Three: Internet Access

3.1 Browser

Require network connection before using a web browser, if there are network supporting problems, please contact your network operator or the service provider.

Make sure the WIFI signal is within range.

Please touch to set up the WIFI connection and select the available WIFI source from the list.

Touch here  in the application list to enter the browser pages; the default homepage is the Recently Viewed showing recently viewed pages.

Browser supports the following features:

Enter the URL-touch the input area to get the soft keyboard, then text the

13. For those losses of removing memory caused by device damage, incorrect repair or some other reasons, our company will not take the responsibility. Please follow this manual to operate this device.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Warning Statement

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure condition without restriction.
