

MANUAL

Connecting the wireless guitar

1. Insert four AA batteries into the back of the guitar.
2. The red light on the receiver indicates that the power is on. The green flashing light indicates that it does not have a connection with the guitar.
3. Locate the ON/OFF switch on the bottom edges of the guitar and turn the switch to the ON position. This should cause the green connection light to stop flashing indicating that a connection has been made.

WARNINGS

Battery safety

Incorrect use of batteries may result in battery leakage, overheating or explosion.

When using batteries, be sure to follow these instructions:

- . Make sure the positive(+) and negative(-) ends of the batteries are inserted in the correct directions.
- . Keep batteries out of reach of children
- . Do not mix old and new or different types of batteries. Use only AA type batteries.
- . remove the batteries when the product will not be used for on extended

period of time.

- . If the battery has leaked, be sure to carefully remove all fluid and dry residues with a paper towel before inserting new batteries, Take care to keep all leaked fluid from touching your skin or clothes, If fluid comes into contact with the skin, flush with water immediately.
- . Dispose of batteries in accordance with local and national disposal regulations.

To insert the Batteries into the Guitar controller:

1. Remove screw from the locking tab on the battery compartment cover.
2. Remove the battery compartment cover by pressing in the locking tab and lifting the cover up and off the unit.
3. Insert 4*AA battery cells. Make sure that the batteries are inserted as indicated by the schematic inside the battery compartment to avoid potential damage.
4. Replace the battery compartment cover back into place on the Guitar controller and replace the screw back into the locking tab.
