Slave

1. Open from the fillister on the bottom of housing or curve side by your nail, like open shell.

2. Put 2pcs batteries into.
*** Make sure the installment direction of positive (+) & negative (-) of battery are followed up the drawing showed on the inside of back battery cover.
3. Set back the battery cover.

Getting Started

1.

For the first time use,
please set the battery into
Master according to above
battery installment .

2.

Switch to power on

3.

4.

Place two devices no more
than 10 cm apart

5.

Signal LED ON for re-linking.

6.

Re-link successful!
Master shows the distance
between Slave via LED and
melody (beep).

Important

If Master can't link with Slave, it
will beep once every few seconds.

[Suggested setting place]

Master

Slave

Alarm

Important

When Slave and Master are over 100 meter or lose signal

Search

Start to detect the location of Slave

Display the intensity of signal on Master by

- 1.) LED light: more closer, more lights.
- 2.) Search melody: more closer, more rapid.

Important

- a.) Error indication - whole direction LED goes off but signal LED lights up 3 seconds then displays new searched distance.
 - b-1.) Search from correct direction to wrong direction
 - b-2.) Over pass

Signal indication LED

East

3 seconds later

LED displays new searched distance

[Suggestion]

Go back to original search direction or location

b.) Mute searching melody from Master. Listen beep sound from Slave to assist short range searching.

Sleeping (No Need The Guard Service)

a.) Switch to sleeping mode

Switch the
button to
section 0

Stop signal
to Slave

Under Standby mode

Slave flashes half minute
to wait for re-linking

No linking then into
sleeping mode and
stop flash

b.) Re-link / Wake up

Important

Can't get signal from Slave.
Signal LED flashes each second
& comes with beep.

(Slave maybe out off working
range 100 meter, or no power.)

Low Battery

1 beep sound every 20 seconds
continuously.

Important

If this kit is under low battery stage,
it may cause abnormal display to
alarm, beeps or non-working to
confuse actual working stage.
Please change new battery as soon
as possible.

Care and maintenance

- (a) Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- (b) Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- (c) Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- (d) Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- (e) Do not attempt to open the device other than instructed in this guide.
- (f) Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- (g) Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.

- (o) This product operational temperature is between $0^{\circ}\text{C} \sim +55^{\circ}\text{C}$. Storage temperature is between $-10^{\circ}\text{C} \sim +60^{\circ}\text{C}$.

Recycle: The Battery provided in this product should be recycled to protect the local environment. Please contact with local recycle department for detail.

Warning: Do not put the battery into the fire or heat resource. It will be cause dangerous or even explosion.

FCC Certifications

Federal Communication Commission Interference Statement

This equipment has been tested and improved to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, if installed and used not in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept an interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications are not expressly approved by the party responsible for compliance which could void the user's authority to operate this equipment.

FCC ID Master: WMPM06A01

Slave: WMPS05A01

EU Declaration Conformity

This product is carrying the CE-Mark in accordance with the related European Directives.
