

## Radio frequency radiation exposure evaluation: portable devices

**RESULT :**

**Pass**

**Test Specification**

Test item	: Door Monitor Tester
FCC ID	: WNG-DMT-21
Identification / Type No.	: DMT-21
Test standard	: CFR47 FCC Part 2: Section 2.1093 FCC KDB Publication 447498 v06

Measurement Record:

E.I.R.P = 60.65- 95.2 = -34.55dBm

Since maximum peak output power of the transmitter is -34.55dBm  $\approx$  0.00000035mW < 22 mW.

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D01 General RF Exposure Guidance v06.
