

Operational description

MCT-212 GS LA

The MCT-212 GS is a miniature waterproof transmitter, operating in 315MHz frequency, designed for home health care signaling. In the event of an emergency, help can be summoned at the press of the transmitter button.

All MCT-212 GS units are supplied with a wrist band and neck strap. They can be worn on the wrist or around the neck.

The LED lights during a transmission to indicate a good battery. If the LED flashes during a transmission, this means that the battery is low and must be replaced immediately. Anytime the MCT-212 GS is pressed when the battery is low, a trouble signal will automatically be sent to the Base Unit.
