Subject: Application for PIR detector with ZigBee protocol Class II Permissive Change of the product with
FCC ID: WP3MP841

Dear Gentlemen,

The following changes were implemented in approved PIR detector with ZigBee protocol FCC ID: WP3MP841:

1. The PYRO was changed due to EOL. The change affect the resistor value for ideal PYRO operation.

No impact in the RF performance of the device after changed the PYRO .
