RE: FCC Limited Modular Approval
FCC ID: WP5EINTLEG1

2021-01-21

To Whom It May Concern:

Please be advised that the manufacturer requests limited modular approval for the transmitter concerned as the module does not have a shielding can over its RF circuitry and the module cannot be operated in a standalone configuration. It is for this reason that the manufacturer will apply for limited modular approval and have control over the installation of the module.

The module is not for sale and the user manual integration instructions are internal confidential manufacturing documents.

We will have full control of the installation of the module as it will only be used by us, Elatec, in our own products and it will only be installed by experienced employees.

Thank you for your attention to this matter.

Yours faithfully
