RE: FCC Limited Modular Approval
FCC ID: WP5TWN4F19

To Whom It May Concern:

Please be advised that the manufacturer requests limited modular approval for the transmitter concerned as the module does not have a shielding can over its RF circuitry. It is for this reason, that the manufacturer will apply for limited modular approval and have control over the installation of the module.

Full control of the installation of the module is permitted as it will only be integrated into devices, which ensure proper mechanical protection against the electronics in general and the transmitter in specific. Other requirements regarding modular approval are valid and kept such as integrated voltage regulator and buffers.

Thank you for your attention to this matter.

Yours faithfully

Birgit Bachl
