Shenzhen Super Test Service Technology Co., Ltd.
No. 813 Unit A, HuaMeiJu Business Center,
Xinhu Road, Bao'an District,
Shenzhen,
China

Ref, FCC ID: WP6-V2

Dear Sir or Madam:

Shenzhen Super Test Service Technology requests acceptance of the labeling proposal described below for transceivers bearing FCC identifier WP6-V2.

The subject product sample are compact watch mobile as shown in figure 1, authorized under 47 CFR Part 22 H & 24 E for public & personal radio services.

Figure 1

Because the majority of the product sample is composed of display, keyboard, operating controls and a removable battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because

the battery pack is a removable item. For this reason, STS proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

Figure 2

The consumer packaging for these models includes the battery pack as a separate item, NOT installed on the radio. As such, the FCC identifier will be readily visible to the user before the battery pack is installed and whenever the battery pack is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

Sincerely yours,

Terry Yang

General Manager
