

To Whom It May Concern,

I am writing this letter to address issues with the location of our product label for the FirstVu HD One product. The issues to be addressed are

- A.) Why FCC ID or label is placed in battery compartment
- B.) How FCC ID or label will be readily viewable
- C.) How FCC ID or label will be readily viewable at the time of purchase

Here are the explanations

- A.) It is placed in the battery compartment because this allows the user to see it every time they change the battery and also keep our product aesthetically pleasing. If there were an external label there would be a chance to create a visible target on the officer.
- B.) The label will be viewed every time the user changes the battery.
- C.) Our units do not come with the battery installed so they must remove the battery door and install the battery before use. They will see the label when they open the battery door.

Thank you,

A handwritten signature in black ink, appearing to read "CS", followed by the date "7/5/16" written in a similar cursive style.
