

Justification for Re-use of radio test results

We, Autel Intelligent Tech. Corp., Ltd., believe that the conducted signal tests for wifi module **AP6212** in the original reports for model MaxiTPMS TS608 can be re-used for the current model MaxiCOM MK808BT, as the following reason:

The difference between them is that the new design of MaxiCOM MK808BT to integrate with new BT module and depopulate the 315MHz, 433MHz and 0.125MHz transmitter.

This change not affects wifi in conducted signals.

FCC ID: WQ8-MK808BT	FCC ID: WQ8MX808-TPMS
---------------------	-----------------------

As per KDB 484596 D01 Referencing Test Data v01, conducted signal tests in following reports re-used.

FCC Part	Reference ID	Report No.	Approval date
15.247,	FCC ID: WQ8MX808-TPMS	GTSL202101000019F03	Approved on 16 Mar. 2017
