Subject: Mistake in the existing grant, FCC ID:WQE723702

Dear Gentlemen,

Please correct output power (EIRP) in the existing grant in 3655-3670 MHz band from 1.28 W to 1.7 W. The maximum measured peak output power is 26.28 dBm, antenna gain 6 dBi, so EIRP is 32.28 dBm = 1690 mW  $\cong$  1.7 W. Please refer to page 9 of the test report WINRAD\_FCC.19456 uploaded to original FCC ID:WQE723702 project.

In Form 731 for Class II permissive change the changed value of 1.7 W was used.

Thank you in advance.

Sincerely,

A handwritten signature in black ink, appearing to be "Dudi Magen", written over a horizontal line.
