TIMCO Engineering Inc. TCB
849 N.W. State Road 45
P.O. Box 370
Newberry, Florida 32669

FCC ID: WR4-MC-I3

Dear Examiner:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

The accompanying Form 731 is being filed with the commission on our behalf by TIMCO

Engineering, Inc. a consulting and testing laboratory. Enclosed as exhibits in the application are block diagram, schematics, parts list and a detailed description of the theory of operation of the device.

It is our intention to provide TIMCO TCB and the commission with a full disclosure of our product so that its merits can be evaluated. Indeed, we are pleased to provide any further information that the commission might wish to see. It is not our intention, however, to make our proprietary process a matter of public record.

In view of the fact that the block diagrams, schematics, parts list and associated theory of operation disclose the mechanism of our process, we ask that these portions (block diagrams, schematics, parts list and theory of operation) of our application be withheld from public inspection as provided under FCC section 0.457(d) and 0.459. These documents contain details of the proprietary operation of product. These details are not readily discernible - even to technically sophisticated individuals - from our hardware and constitute trade secrets.

We request therefore that these documents be segregated from the body of our evaluation report and withheld from public inspection.

Thank you for your attention. Please let the undersigned know if TIMCO TCB or the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in black ink, appearing to read "Ferdinand Riodique", written over a horizontal line.

Ferdinand Riodique
