Getting Started

Charging

Warning!
Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone's type approval and guarantee.

When the battery is running low, is displayed and a warning signal is heard. To charge the battery, connect the AC power adapter to a wall socket and to the charging socket on the phone.

Important!
Turn off the phone and disconnect the charger before removing the battery cover.

Installing the SIM card and battery
The SIM card and battery are normally pre-installed for you. Follow these instructions should you ever need to access them yourself.

1. Remove the battery cover and the battery if it is already installed.

2. Optional: Insert the memory card into the slot under the SIM card holder. Make sure that the memory card contacts are facing upwards and push the card in, until you hear a click. Take care not to scratch or bend the contacts on the card.

To remove or replace the card, push it in until you hear a click and then pull the card out.

3. Insert the SIM card by gently sliding it into the holder. Make sure that the SIM card's contacts are facing downwards and that the cut off corner is pointing inwards. Take care not to scratch or bend the contacts on the SIM card.

4. Insert the battery by sliding it into the battery compartment. Replace the battery cover.

Important!
Use only compatible memory cards for use with this device. Compatible card type: microSD, microSDHC. Incompatible cards may damage the card and the device and corrupt data stored on the card. Memory cards are sold separately.

Getting Started

Turning phone on & off

Press and hold the red button on the phone to turn it on/off. It takes several seconds so keep holding until you hear the sound.

Setting the language, time and date

These are all set for you. The default menu language is English. See the full manual if you would like to change this setting.

The date and time are automatically set to the local time for the area you are in when the phone is powered on.

Start-up wizard

When starting the telephone for the first time, you can use the Start-up wizard to set some basic settings.

When Run start-up wizard? is displayed, press **Yes** to change **Language, Time & date, Ring tone, Volume, Text size** or **Themes**. Press **No** if you don't want to change.

See *Settings/General/Start-up wizard* in the complete manual.

Getting Started

Selection buttons

The selection buttons have multiple functions. The current button function is shown above the selection button on the display.

Call log

Received, missed, and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, only the most recent call is saved.

Retrieving and dialling

1. Press .
2. Use to scroll through the call log
 = Received call
 = Dialled call
 = Missed call
3. Press to dial the highlighted number.

Using Phonebook

The Phonebook can store 100 entries with 3 phone numbers in each entry.

Creating a phonebook entry

1. Press **Menu**, scroll to and press **OK**.
2. Select **-New contact-** and press **Add**.
3. Enter a **Name** for the contact, see *Entering text*. Delete with **Clear**.
4. Use to select **Mobile number**, **Home number** or **Office number**, enter the phone number(s) including the area code.
5. Select **Picture** and press **Edit** to associate a picture to the contact. This picture will be displayed when the corresponding contact is calling you and may also be visible in the phonebook. Select **Take picture** and press **OK** for using the camera to take a picture. Select **My pictures** and press **OK** to select an existing picture.
6. Press **Save**.
7. Press to return to standby.

See *Settings/General/Phonebook picture* in the complete manual.

Deleting entries in Phonebook

→Menu→Phonebook→Scroll to desired entry→Options→Scroll to Delete→OK
Press **Yes** to confirm or **No** to cancel.

Getting Started

Making a call from the phonebook

Press **Name** to open the phonebook.
Use / to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the entry.
Press **Call** to dial the highlighted entry, or press **Back**.

Creating ICE entry (In Case of Emergency)

First responders can access additional information such as medical information from the victim's phone in case of emergency. In the event of a trauma, it is critical to have this information as early as possible to increase the chances of survival. All fields are optional, but the more information provided the better.

1. Press **Menu**, scroll to and press **OK**.
2. Select **+ICE** and press **OK**, then use / to scroll the list of entries.
3. Press **Edit** to add or edit information in each entry. Delete with **Clear**. Press **Save** when done.

See *Phonebook/ICE* in the complete manual.

Camera

To get sharp photos, wipe the lens clean with a dry cloth.

1. Press shortcut or press **Menu**, scroll to and press **OK**.
2. Press to take photo.
3. Press **Options** or **Back** (if you do not make any selection the picture is saved).

Messages

Creating and sending text messages

1. Press shortcut or press **Menu**, scroll to and press **OK**.
2. Select **Text message** and press **OK**.
3. Type your message, then press **To**.
4. Select a recipient from phonebook and press **OK**. Alternatively, select **Enter number** and press **OK** to add recipients manually and press **Done**.
5. Select **Add** to add more recipients or select **Send** to send and then press **OK**.
6. You can also modify the recipients by selecting one and press **Options** to **Edit**, **Delete** or **Delete all**.

Entering text

Press a numerical key repeatedly until desired character is shown. Wait a few seconds before entering the next character.

Press ***** for a list of special characters. Select the desired character with / and press **OK** to enter it.

Use the side keys **+/-** or / to move the cursor within the text.

Press **#** to cycle upper case, lower case and numerals.

Entering text with predictive text

In some languages you can use Smart ABC (eZiType™) input method which uses a dictionary to suggest words. See *Settings/Messages/Predictive text* in the complete manual.

Entering phone numbers

For international calls, always use + before the country code for best operation. Press ***** twice for the international prefix +.

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or credit card billing numbers. There are two types of pauses available on your phone, press ***** repeatedly until desired character is shown.

Other Call Options

Voice mail

The voice mailbox can be called by pressing and holding **1**.

Speed dial

The numerical buttons **A** and **B-C** and the numerical keys **0** and **2-9** can be used for speed dialing.

Adding speed dial numbers

→Menu→Settings→Calls→Speed dial

Top 10

Set the entry as one of the first 10 contacts listed in the phonebook.

→Menu→Settings→Calls→Top 10

Bluetooth®

You can connect wireless to other Bluetooth compatible devices such as headsets.

→Menu→Settings→Bluetooth→OK

SOS/911 Calls

As long as the phone is switched on, it is always possible to place an SOS call by entering the main local emergency number for your present location followed by .

Most networks accept calls to emergency numbers without a valid SIM card. Contact your service provider for more information.

Note!
Sometimes an emergency call cannot be placed due to network, environment or interference issues.

Emergency key

The Emergency key on the back of the phone will automatically dial one number for you. This can be used as a easy way to reach a family member or friend if you need help. The Emergency Call function must be activated before use. See the full manual at www.ConsumerCellular.com/support OR www.doro.com for instructions.

Messages

Note!
If you choose to add multiple recipients, you will be charged for each recipient (maximum 10).

Reading an incoming message

When you receive a message while your phone is on, the screen will display . Press **Read** to read the message.

Creating and sending picture messages

A picture message can contain text and media objects such as pictures, sound recordings and video. Both you and the recipient must have subscriptions that support picture messages.

1. Press shortcut or press **Menu**, scroll to and press **OK**.
2. Select **Picture message** and press **OK**.
3. Type your message, then press **Options**.
4. Add items to your message from the options **Add picture**, **Add sound**, **Add video** and **Add subject**.
5. Add recipients with **To** and **Send** when ready.

See *Messages* in the complete manual.

Custom Settings

Silent mode

Use **Silent** to silence your ring tones.
Press and hold **#** to activate/deactivate **Silent**.

Tip:
Press and hold **+ or -** to temporary switch off the ring signal without opening the flip.

Changing ring tones

You can select different ring tones. Follow this sequence to reach the customization.

→Menu→Settings→Sound Tone setup→Ring tone

Use / to scroll between options. When you pause on a melody, you will hear its sound. Once you have found the ring tone you wish to use, press **OK** to select.

You can use this same process to customize the tones for your the **Alarm, Message tone, Opening tone, Closing tone, Keypad tone, Power on** and **Power off** in the same way.

Display background (wallpaper)

You can select different display backgrounds.

→Menu→Settings→Display→Wallpaper

Useful Tools

Alarm

Use the Alarm feature to set wake-up call or help you keep track of an important time.

Organizer

Use the Organizer to store tasks to help you keep track of important events.

Note!
These functions will work even when the phone is switched off.

Calculator

The Calculator can perform basic math operations.

Image viewer

View your saved images and detailed information about files, e.g. date, size, copyright.

Flashlight

Note!
The flashlight will drain the battery very quickly. Remember to turn off the flashlight after use.

16.

FCC/Industry Canada notice

Cet appareil est conforme aux dispositions de la partie 15 des règles de la FCC et des normes CNR d'Industrie Canada sur les appareils radio exempts de licence. Son utilisation est assujettie aux deux conditions suivantes : (1) Cet appareil ne doit pas causer d'interférence nuisible; et (2) cet appareil doit accepter toute interférence reçue, y compris l'interférence qui pourrait causer un fonctionnement non désiré.

Cet équipement a été testé et jugé conforme aux limites d'un appareil numérique de la Classe B, en vertu de la partie 15 des règles de la FCC et de la NMB-003 canadienne. Ces limites sont conçues pour fournir une protection raisonnable contre l'interférence nuisible dans une installation résidentielle. Cet équipement génère, utilise et peut émettre de l'énergie radiofréquence et, s'il n'est pas installé et utilisé conformément aux instructions, peut causer une interférence nuisible aux communications radio. Toutefois, il n'est pas garanti que l'interférence ne se produira pas dans une installation particulière. Si cet équipement cause une interférence nuisible à la réception radio ou de programmes de télévision, laquelle peut être déterminée en éteignant et en allumant l'équipement, l'utilisateur est encouragé à essayer de corriger l'interférence par l'une ou plusieurs des mesures suivantes :

- Réorientez ou relocalisez l'antenne de réception.
- Augmentez la séparation entre l'équipement et le récepteur.
- Connectez l'équipement à une prise sur un circuit différent de celui auquel de le récepteur est connecté.
- Consultez le vendeur ou un technicien radio/de télévision pour obtenir de l'aide.

La FCC ou Industrie Canada peut vous obliger à arrêter d'utiliser votre appareil si une telle interférence ne peut pas être éliminée.

Doro n'a pas approuvé les changements ou modifications apportés à cet appareil par l'utilisateur. Tous les changements ou modifications apportés peuvent entraîner la révocation de l'autorisation d'utilisation de l'appareil.

18.

FCC/Industry Canada notice

This device complies with part 15 of the FCC Rules and Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules/Canadian ICES-003. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC or Industry Canada can require you to stop using your unit if such interference cannot be eliminated.

Doro has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment.

17.

Safety Instructions

CAUTION

The unit and the accessories can contain small parts. Keep all of the equipment out of the reach of small children.

The mains adapter is the disconnect device between the product and mains power. The mains socket outlet must be close to the equipment and easily accessible.

Network services and costs

Your device is approved for use on the WCDMA 850/1900 MHz, GSM 850/1800/1900 MHz networks. To use the device, you need a subscription with a service provider.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Operating environment

Follow the rules and laws that apply wherever you are, and always turn off the unit whenever its use is prohibited or can cause interference or hazards. Only use the unit in its normal user position.

This unit complies with guidelines for radiation when it is used either in a normal position against your ear, or when it is at least 0.6 in from your body. If the unit is carried close to your body in a case, belt holder or other holder, these holders should not contain any metal, and the product should be placed at the distance from your body specified above. Make sure that the distance instructions above are followed until the transfer is complete.

Parts of the unit are magnetic. The unit can attract metal objects. Do not keep credit cards or other magnetic media near the unit. There is a risk that information stored on them can be erased.

19.

Safety Instructions

- **Assess the traffic before dialing, or place calls when you are not moving or before pulling into traffic.** Try to plan calls when your car will be stationary. Never dial, send SMS text messages, or enter other text while you are driving.
- **Let the person you are speaking with know you are driving.** If necessary, suspend the call in heavy traffic or hazardous weather conditions. Driving in rain, sleet, snow, ice, fog, and even heavy traffic can be hazardous.
- **Do not take notes, look up phone numbers, or perform any other activities that require your attention while driving.** Jotting down a to-do list or flipping through your address book takes attention away from your primary responsibility, driving safely.
- **Do not engage in stressful or emotional conversations that may be distracting.** Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.

RF exposure information (SAR)

This model phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual

24.

SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.71 W/kg and when worn on the body, as described in this user guide, is 0.76 W/kg (Body-worn measurements differ among phone models, depending upon available enhancements and FCC requirements.) While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/ea/fccid> after searching on **FCC ID: WS5DOR0618**.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm (5/8 inch) from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines.

If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm (5/8 inch) from your body when the phone is switched on.

*In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. SAR values may vary depending on national reporting requirements and the network band.

25.

professional to determine the M rating of your hearing aid and whether your hearing aid will work with this device.

TTY compatibility

This unit does not support TTY signaling. If you intend to connect a TTY to the unit, this unit should not be purchased and, if already purchased, it should be returned for a refund.

Care and Maintenance

Your unit is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

- Protect the unit from moisture. Rain/snowfall, moisture and all types of liquid can contain substances that corrode the electronic circuits. If the unit gets wet, you should remove the battery and allow the unit to dry completely before you replace it.
- Do not use or keep the unit in dusty, dirty environments. The unit's moving parts and electronic components can be damaged.
- Do not keep the unit in warm places. High temperatures can reduce the lifespan for electronic equipment, damage batteries and distort or melt certain plastics.
- Do not keep the unit in cold places. When the unit warms up to normal temperature, condensation can form on the inside which can damage the electronic circuits.
- Do not try to open the unit in any other way than that which is indicated here.
- Do not drop the unit. Do not knock or shake it either. If it is treated roughly the circuits and precision mechanics can be broken.
- Do not use strong chemicals to clean the unit.

27.

Safety Instructions

Medical units

The use of equipment that transmits radio signals, for example, mobile phones, can interfere with insufficiently protected medical equipment. Consult a doctor or the manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions.

Comply with any notices at health care facilities instructing you to turn off the unit while you are there. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. Persons with pacemakers:

- Should always keep the phone more than 6 inches (15 cm) from their pacemaker when the phone is turned on.
- Should not carry the phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimize the potential for interference.

If you have any reason to suspect that interference is taking place, turn the phone off immediately.

Areas with explosion risk

Always turn off the unit when you are in an area where there is a risk of explosion, typically these are areas where you normally requested to turn off your car engine. Follow all signs and instructions.

In these areas, sparks can cause explosion or fire that can lead to personal injury or even death.

20.

Safety Instructions

Vehicles

Radio signals can affect electronic systems in motor vehicles (for example, electronic fuel injection, ABS brakes, automatic cruise control, air bag systems) that have been incorrectly installed or are inadequately protected. Contact the manufacturer or its representative for more information about your vehicle or any additional equipment.

Do not keep or transport flammable liquids, gases or explosives together with the unit or its accessories. For vehicles equipped with air bags: Remember that air bags fill with air with considerable force.

Do not place objects, including fixed or portable radio equipment in the area above the airbag or the area where it might expand. Serious injuries may be caused if the mobile phone equipment is incorrectly installed and the airbag fills with air.

It is prohibited to use the unit while in flight. Turn off the unit before you board a plane. Using wireless telecom units inside a plane can pose risks to air safety and interfere with telecommunications. It may also be illegal.

Driving safely

Adapted from CTIA-The Wireless Association®

Warning!

Use of this unit alone or with headphones (even if used only in one ear) while driving a motor vehicle or riding a bicycle is dangerous and is illegal in some areas, and the user should not engage in such conduct. Driving while operating a mobile phone is distracting and could cause serious injury or death.

22.

Turn off the unit at filling stations, and any other place that has gas pumps and auto repair facilities.

Follow the restrictions that apply to the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress.

Areas with risk for explosion are often – but not always – clearly marked. This also applies to below decks on ships; the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder.

Protect your hearing

WARNING:
Excessive exposure to loud sounds can cause hearing damage.
Exposure to loud sounds while driving may distract your attention and cause an accident.

Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

Emergency calls

Important!

Mobile phones such as this unit use radio signals, the mobile phone network, the terrestrial network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, you should never rely solely on a mobile phone for very important calls such as medical emergencies.

21.

Warranty and technical data

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a malfunction occurring during this period, please contact Consumer Cellular. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a malfunction caused by an accident or a similar incident or damage, liquid penetration, negligence, abnormal usage, non-maintenance or any other circumstances on the user's part. Furthermore, this guarantee will not apply to any malfunction caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm.

Batteries are consumables and are not included in any guarantee.

This guarantee does not apply if batteries other than DORO original batteries are used.

Note!

This guarantee does not affect your legal (statutory) rights under your applicable national laws relating to the sale of consumer products.
