The remaining amount of 25 % - 100% when	White light always on

Charging case charging indicator	
status	Indicator light display
Amount of 0 to 99% charging	White light breathing
full charge	White light always on

6 . Specifications

Bluetooth specification Bluetooth specification	Bluetooth 5.0 version Bluetooth 5.0
Frequency Range Operation frequency	2.402-2.480GHz
supporting agreement Supported profile	HFP, HSP, AVRCP, A2DP
Chip scheme Chip solution	QCC3020
Decoding method	aptX™ SBC AAC
Use range Operation range	Up to 10 meters range UP to 10 meters
Call time Talk time	Headphone usage: about 3.5 hours (70% volume)

	Use with charging case: about 12 hours (70% volume)
Music time Music time	Headphone use: about 4 hours (70% volume) Use with charging case: about 16 hours (70% volume)
Standby time Standby time	Headphone standby: about 8.5 hours About 8 h 30min Put the earphone into the charging case and stand by for more than 1000 hours
type of battery Battery type	Headphone: 3.7V 35 mAh Charging case: 3.7V 350 mAh
Charging time Charge time	Headphone / charging case: . 1 .5 ± 0.5 hours
Charging case interface C harger C harging P ort	USB-C OVP>10V supports C2C line charging
Operating temperature Operating temperature	-5 - 50°C
net weight Net weight	Total about 50.6 g (earphone: 4.3 g*2 ; charging case about 42g)
speaker S peaker	5.6 mm diameter composite diaphragm, sound reference prototype (TT-BH072)

*The above data is from Tianyi Lab. Actual use time will vary depending on the environment and music.

8 . Notes and Q & A

A. How to connect back? What should I do if I can't connect back?

When the " KH-27 " is successfully connected to your mobile phone, it will automatically connect back to your mobile phone every time you turn it on. If you can't connect back, please re-pair and connect.

B. How to clear the pairing record?

In the charging case, press and hold the button of the charging case for 10s until the LED of the charging case flashes white 3 times at the same time. After clearing the pairing, the earphone will automatically restart and enter the mobile phone pairing state . The KH-27 will no longer connect to the previously connected device. When various connection abnormalities occur, you can try to clear the pairing records.

C. Under what circumstances will it automatically shut down?

It will automatically shut down when there is no connection for more than 10 minutes or the battery voltage is less than 3.1V in the pairing state .

D. Under what circumstances will the low battery alarm be issued, and what are the prompts?

When the earphone battery voltage is lower than 3.2V, there will be a beep every 3 minutes.

E . What is pair password?

If a password input prompt appears when some devices are connected to KH-27 , try to enter 0000 (four 0s), 8888 (four 8s), 1111 (four 1s), or 1234

F . Can be charged with what equipment?

As long as it meets the DC voltage of 5V and the current of 1 A or more, Type-C can charge the " KH-27 " charging case .

G . Some exceptions, such as the connection exception and so how do?

Put the earphone into the charging case to keep the cover open , and quickly press the button of the charging case five times , the white light will light up and reset .

H. How to enter the pairing state?

Put it into the charging case, close the cover and take it out again to enter the pairing mode .

I. Can it be used while charging?

Can't.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are

designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio

frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
