### Dear Sir or Madam:

We, (company name: Changsha SunSky Electronic Design & Development Co., Ltd.) hereby declare that product series of C4000T have assembled the RF chip CC2500, with the working frequency ranges from 2404 to 2466MHz, and supported MSK modulation. Other modulation types including OOK, 2-FSK and GFSK are not applicable to above two products and unable to be activated by any end user or distributor. Please note that MSK modulation is written in C4000T firmware, which is unable to modify by any end user or distributor.

Please contact me if there is need for any additional clarification or information.

Best Regards,
