

American Certification Body Inc.
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

ACB:

I can see from the literature and the block diagram that this device includes an option for a GSM transceiver for connection to the GSM network. Please explain, or confirm that this certification does not include the model which could contain a GSM transceiver.

Applicant:

Application is only covering the operation without GSM transceiver. We understand that the inclusion of a pre-certified GSM transceiver will require a C2PC application.
