RE: FCC Declaration of Host Similarity for FCC IDs: **WUW-22135255** and **WUW-22135255B**

To Whom It May Concern:

This letter serves as an attestation of similarity between the NSC-100 portable host that is currently referenced in the grants for FCC IDs WUW-22135255 and WUW-22135255B and VIAVI Solution's new NSC-200 portable host. Physical construction and the printed circuit board contained within the two products is identical. The antennas and their locations are also unchanged. The only difference is that the latter's board is populated with a different, but pin-compatible FPGA IC device from the same family having additional internal logic and memory elements. Due to the minimal nature of this change and the FPGA component being unrelated to performance of the embedded radio modules associated with the above referenced grants, VIAVI Solutions believe that previously reported test results will remain unaffected by this change.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in blue ink that reads 'Ben Brooks'.
