2 Getting started

Dimension 106.5(L)x45(W) x 12.5(H) mm
Weight (include battery) 75g
Battery: 900 Ah

Note: Always switch off the power and disconnect the charger and any other device before removing the back cover. Avoid touching electronic components while changing the cover. Always store and use the device with the cover attached.

2.1 Install and remove battery
Turn off the phone, remove the back cover of the device, and observe the battery aligned with the gold-colored contacts and insert the battery into the battery slot. To remove the battery, insert your finger into the finger grip and lift the battery from its compartment.

Note: Always switch the device off and disconnect the charger before removing the battery.

2.2 Headset and MicroSD card

■ Headset

Plug the headset connector into the Port connector at the bottom of your phone. Put the headset on your ear. With the headset connected, you can make, answer, and end calls as usual.

■ MicroSD card

Remove the back cover and battery of the device; microSD card slot is in the right top side on battery slot. Insert the card into microSD card slot with the contact surface facing down, and press it until it locks into place. To remove microSD card, pull out the SD card lightly from the slot.

NOTE: Do not remove the memory card during any operation when the card is being accessed. This may damage the memory card as well as the device, and data stored on the card may be corrupt.

2.3 Charge the battery

➢ **USB Charging**

Connect the USB cable to computer and the socket on the bottom of your device. When charging, the battery level icon will

display the status.   If you power on the device and connect to computer, it can be treated as a U-Flash disk for data transfer.

➢ **Charger Charging**
Charger can charge the battery of your mobile phone. Following is the battery charging step:
1. Connect through the USB interface by data cable.
2. Insert the cable to your mobile phone's interface.
3. Insert the charger to the proper power socket.
4. Then charging animation will stop after charging done.

NOTE: If the battery is not enough to power on your mobile phone, it may take a longer time than usual before the charging animation appears on the display.

WARNING: To make sure the local standard voltage and frequency match up your charger's rated voltage and power.

3 Basic Function

3.1 Power on and off

To switch the phone on or off, press and hold the power key .

3.2 Standby mode

At standby mode you can quickly access your most frequently used applications, and view at a glance if you have missed calls or new messages, options as below:

■ Press left function key to "Menu"
■ Press right function key to "Names" (contacts)
■ Press dial key to call history.
■ Press * key for 2 sec to turn on/ off silent function.

■ Press # key for 2 sec to lock the keypad quickly
■ Unlock the keypad, please press upper- right function key then press # key.

■ Shortcut setting :
There are five different shortcuts you can choose in standby mode.

Default shortcut:
- Changeable: Dial screen, Profiles, Contacts, Messages, Call log,
- Unchangeable: missed calls, new messages, today's appointment
(Please refer to picture in Topic 3.2 Standby mode)

You can change the shortcuts assigned for selection keys in the standby mode as follow procedure:

Select **Menu > Settings > Phone settings> Shortcut >Shortcut application**

1. Select one of shortcut entry from Shortcut 1- 5.
2. Shortcut list included dial, messages, contacts, log, Media data, Profile, MP3, MP4, FM, Camera, Calculator, Alarm, Calendar, WAP, MMS, and ATV.
3. You can choose your frequently use function in the shortcut list.

3.3 MAKE A CALL

You can start a call in several ways:

■ Using the keypad

Enter the phone number, including the area code, and press the   Dial key. Then press the   End key to end the call or to cancel the call attempt.

For the international calls, press * twice for the international prefix (the + character

16

replaces the international success code), enter the country code, the area code without the lead 0, if necessary, and the phone number.

■ Using the contact list

At the standby mode, press right function key to "Name" access contacts and scroll to the entry you wish to view. Then press the ☎ Dial key to make the call, or press Details to view details of the entry.

■ Using the last dialed number

At the standby mode, press the ☎ Dial key once to display the last dialed number. Then select the number (or name) you wish to redial and press the ☎ Dial key.

■ Call function:

During a call, press left function key the options as below:

1. Hand free: use your phone as a loudspeaker during a call
2. Mute: to put all active calls on mute
3. New call: during a call, dial another call to have a conference call with two participants.

4. End all calls: end all calls
5. Send DTMF: to send tone strings
6. Start record: start to record the phone call.

3.4 Answer / End a call

To answer an incoming call, press the
Call key. To decline the call without
answering, press the   End key.

4 Write text

In any user edit window, including edit phone book, messages and memo, press the # key to switch the input method editor.

4.1 Input method

To change the character case, press # to switch uppercase or lowercase. Press a key once to insert the first letter on the key, twice for the second letter, etc. If you pause briefly, the last letter in the display is accepted and cursor appears and awaits the next entry.   The character cases are indicated as below:

ABC indicate the uppercase
abc indicate the lowercase

123 indicates number mode

To write text with the keypad, press a number key, 2 to 9, repeatedly until the desired character appears. There are more characters available for a number key than are printed on the key. If the next letter you want is located on the same key as the present one, wait until the cursor is displayed, and enter the letter. To insert a number, press and hold the number key. To switch between the different character cases and modes,

4.2 Input special character

To access the most common punctuation marks and special characters, repeatedly press the number key 1 or press * to select a special characters in the character list. To confirm a word by adding a space, press 0.

UTK is operator service. You may get detailed information from your local operator company.

13 Safety information

Battery information

- Your device is powered by a rechargeable battery.
- The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, please replace a new battery.
- Use only the approved batteries, and recharge your battery only with the approved chargers designated for this device.
- Unplug the charger from the electrical plug and the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time.

Operating Environment

- Remember to follow special regulations in any area and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. Do not keep the device near credit cards and other magnetism medium, some accessories can bring magnetism that may be delete the data.
- Pacemaker manufacturers recommend that a minimum separation of 6in (20cm) should be maintained between a wireless phone and a pacemaker to avoid potential interference' with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. To minimize the potential interference, persons with pacemakers should do as below.
- Always keep the device more than 6 in (20 cm) from their pacemaker when the device is switched on.
- Not carry the device in a breast pocket. Hold the device to the ear opposite the pacemaker

- If you have any reason to suspect that interference is taking place, switch off your device immediately.

Hearing aids

Some digital wireless devices may interfere with some hearing

Small children

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Other medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Switch off your phone in health care facilities when any regulations are posted in these areas instructing you to

14 Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation,

humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.

- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog

the moving parts and prevent proper operation.

- Use a soft, clean, dry cloth to clean any lenses, such as camera, proximity sensor, and light sensor lenses.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.
- Use chargers indoors.
- Always create a backup of data you want to keep, such as contacts and calendar notes.
- To reset the device from time to time for optimum performance, power off the device and remove the battery.

15 FCC Warning Statement

A. For FCC 15b devices

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the

receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

B. FCC Part 15.21 information for user
You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC RF Radiation Exposure Statement:
1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television

reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation

D. For portable devices without co-location condition
FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled enviroement. This device and its antenna must not be co- located or operation in conjunction with any other antenna or transmitter.

IMPORTANT NOTE:
Federal Communication Commission (FCC) Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. This equipment should be installed and operated with minimum distance 1.5cm between the radiator & your body.
