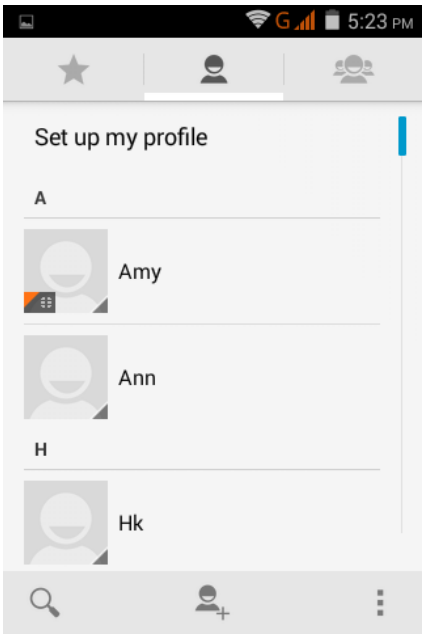
## Information Function

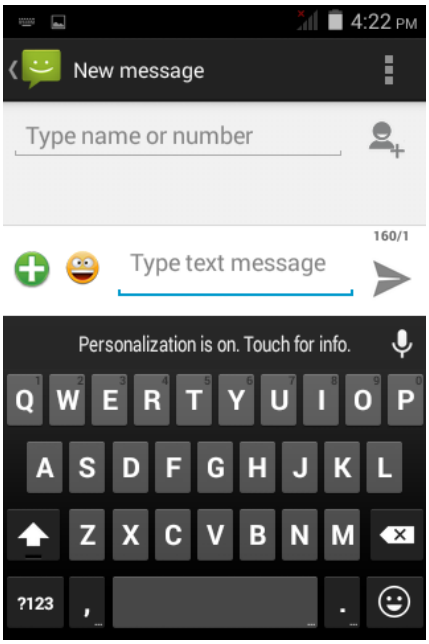
To sort the information by contacts, the conversational arrangement, user understanding of the history of the entire communication information, information sorted according to first contacts, including contact name for the first letters（A-Z）, then numbers

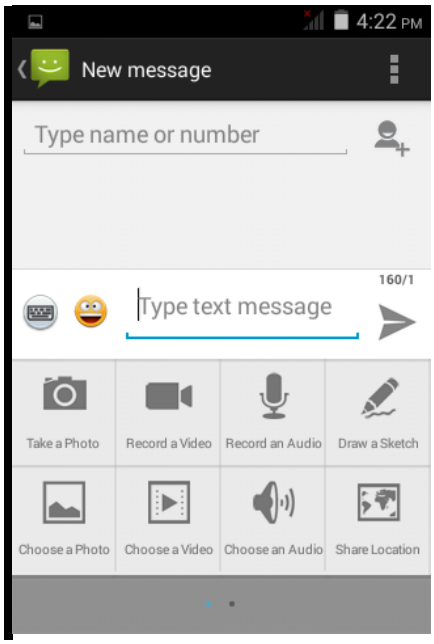


**Send MMS**

New information -"click , add "function - " to select the desired additional content;

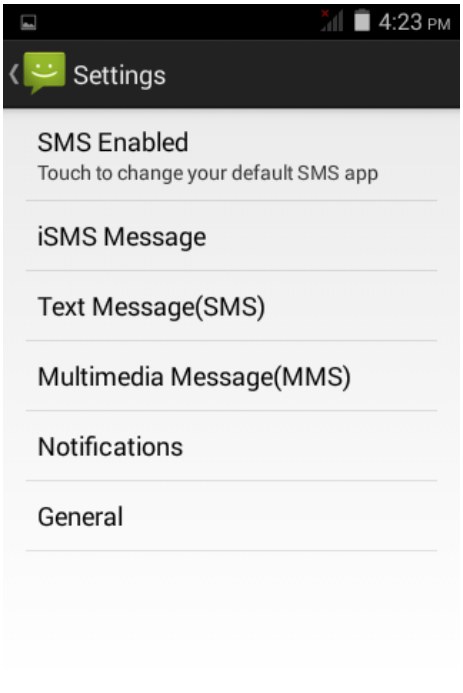
New information-click the menu button -add theme

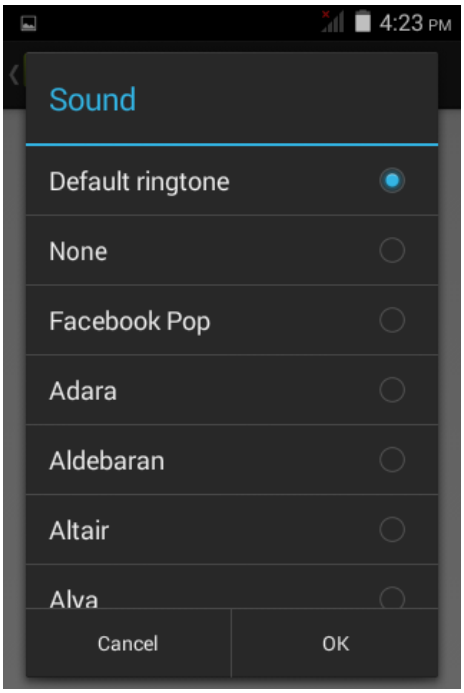




Replacement SMS reminder tone

Access to the information interface - "click the menu button, select "Settings "function ,select "Notifications "function ,Select "Ringtone"function;

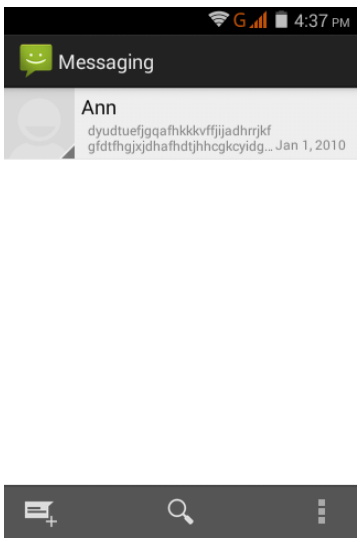


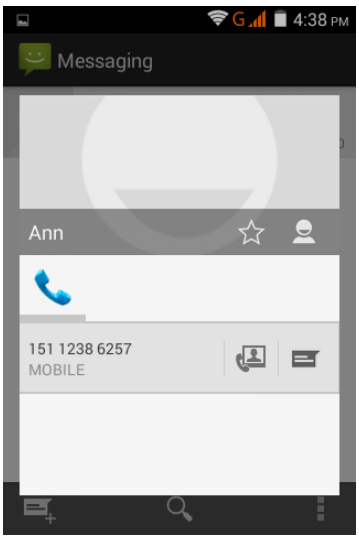


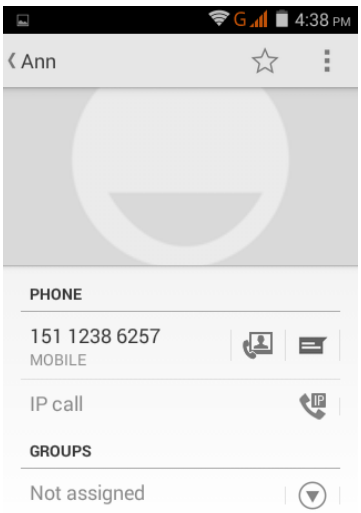
View the sender information

Access to the information screen - "Select the message - " click -

"click ,can view the sender information”-”click ,can add to favorites”



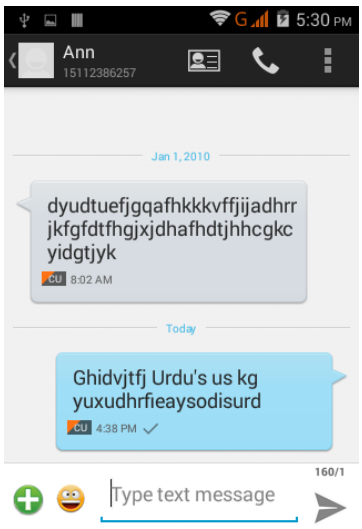


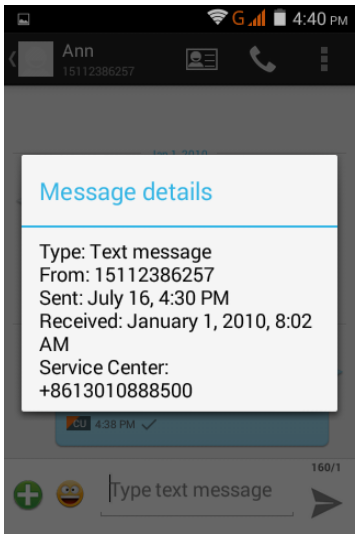


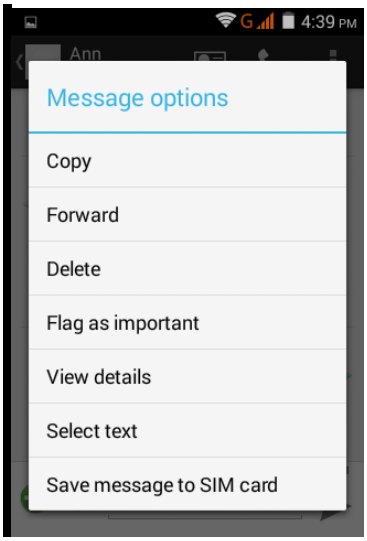
Forwards

Access to the information screen - "Select the message - “short press the

message can display the message details" -Long press the Information, there shortcut keys - "select"Forward "function

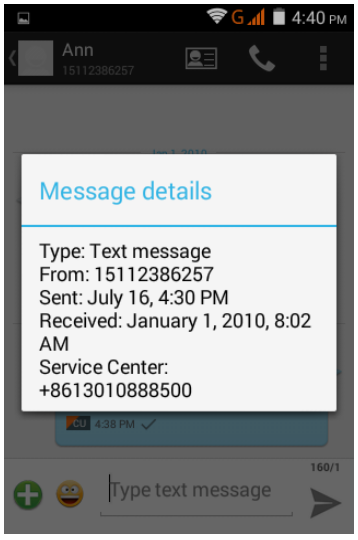






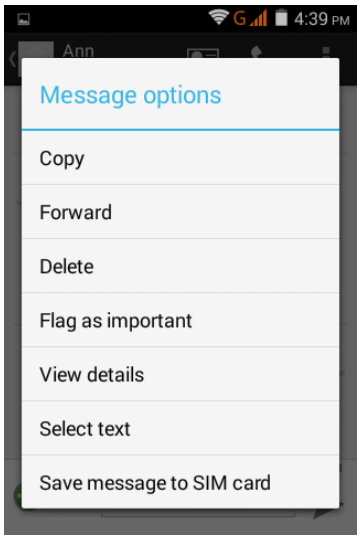
View information details

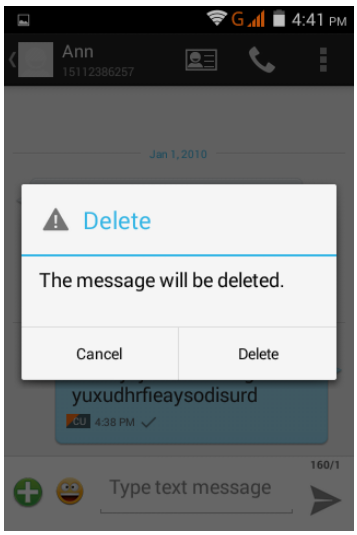
Access to the information screen- "Select the message-" Long press the Information, there shortcut keys -"select View details "function



Delete information session specific information on a particular

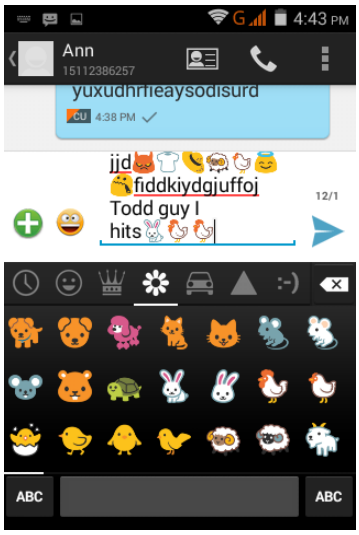
Access to the information screen - "Select the message - " Long press and Information, there shortcut keys - "select "Delete "function





**Emoji Keyboard**

Support rich interesting Emoji input,make your message more personal

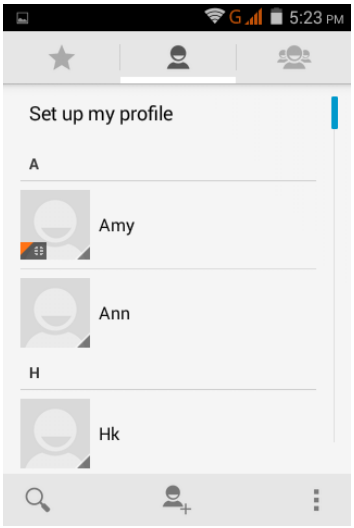


**Contact Features**

contacts groups, contacts and favorites feature;

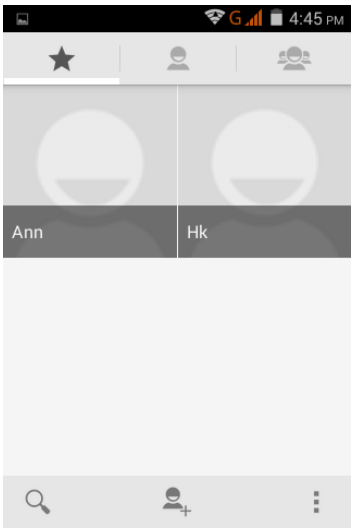
Book description

By the first sort the way English characters （A-Z）, then number



Favorites Introduction

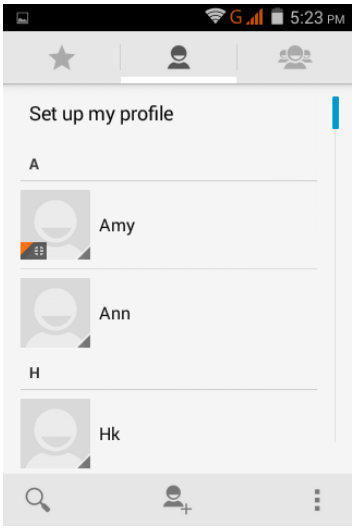
Included collection of contacts, and users often call the recent contact information, part of the overall fabric Top of the contact information for the user collection, lower often call into the system default contact information;

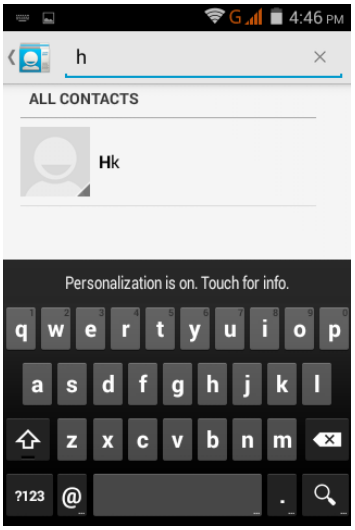


Contact Search

Into the contact interface - "click button

Search supported by the first letter and the entire search string

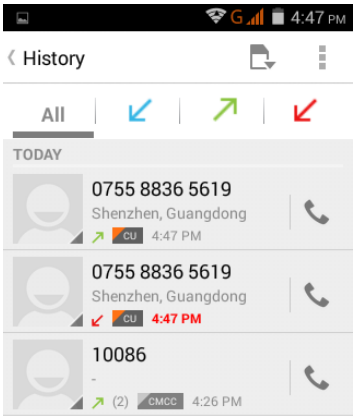


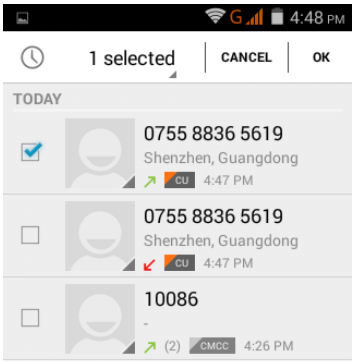


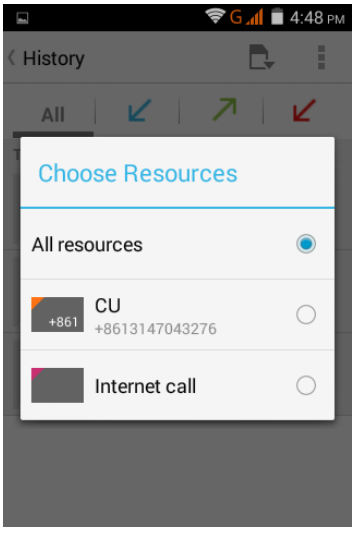
Import contact information methods
using Bluetooth to achieve data synchronization
Andy 5EI phone and the original binding, using Bluetooth to achieve synchronization of contacts;

**Call History Features**

One by one to delete call records
Enter the call log interface - "Click the menu button –Select the delete Function- " Choose the delete call records- click ok button-"Click , choose the resources of the sim card"

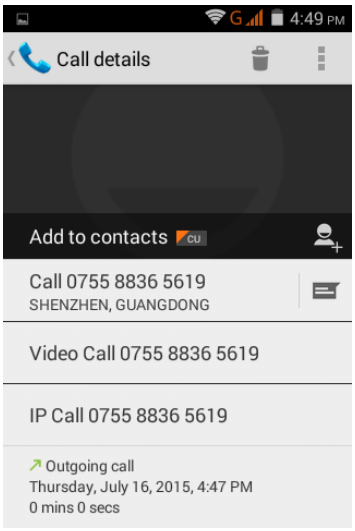


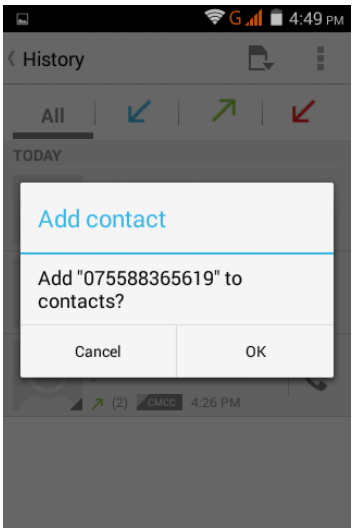




Contact information stored call records
Enter the call log screen - "Select the Save call log - " click- "select "Add to Contacts "feature

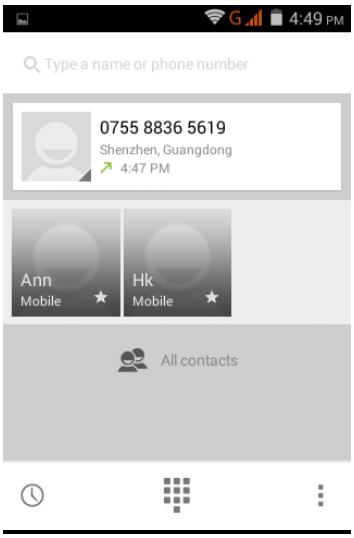
Or directly into the call log entry, -click  button -select "Add to Contacts "feature





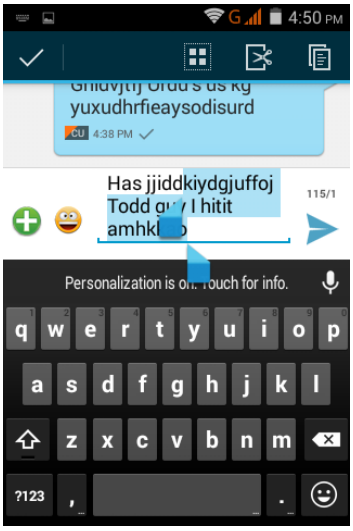
**Dail and caller ID display <u>Features</u>**

New dial-up procedures will be according to your habits, automatic intelligent recommend commonly used contact, convenient to speed dial,Some well-known enterprises or service of the number of the caller, using Google's online database for matching automatically display name.



**Paste the text / copy Features**

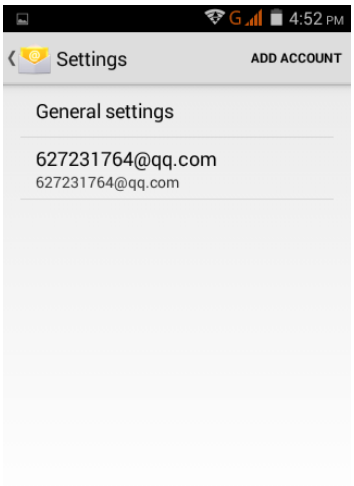
Into the input field - "input string, long press and enter the region, there shortcut keys - " select All " " cut All " ,"copy All","paste All"



## E-mail Features

Configuring mail account
Enter the Program Group screen - "Select"Email"application -"Enter e-mail address and password
If the system automatically recognizes the mailbox information, will automatically configure; if the system does not recognize, will require users to type IMAP mailbox, or POP3, enter the appropriate configuration information.

For example:
E-mail Address: 627231764@qq.com
Password:
Configure multiple email accounts
Enter the Program Group screen - "Select"Email"application -" Click on the menu button-select setting function -select "Add Account"feature



Delete email account
Enter the Program Group screen - "Select"Email"application - Click on the menu button-select setting function –select account - " select the "Remove Account"function

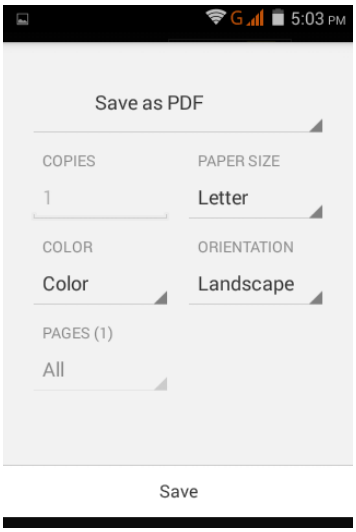
Delete the contents of the desktop
Select the desktop content - then "Long press the icon - " into the remove icon to the lower right corner of the screen

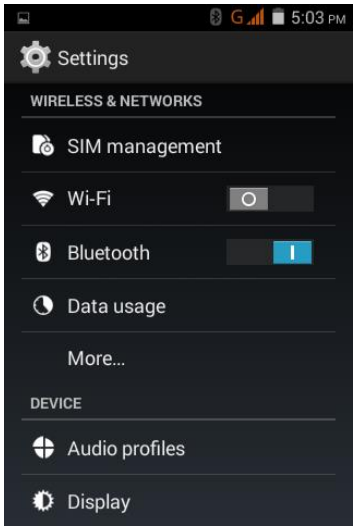
**Wireless Printing Function**

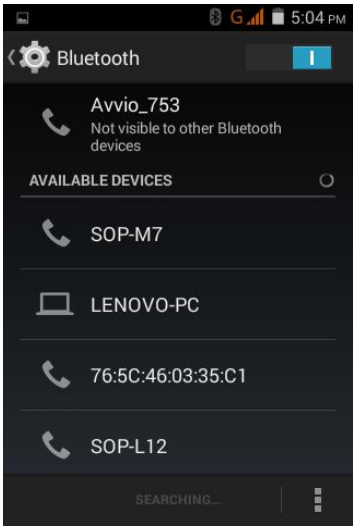
You can use Google Cloud Print to Print the photos, documents, or web pages.”gallery-choose one picture -menu-print-set a google account -choose print /save as PDF”



## Bluetooth Function

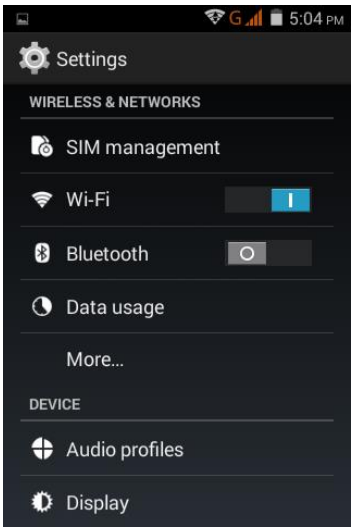
Select "Settings" -" Select "Bluetooth"function

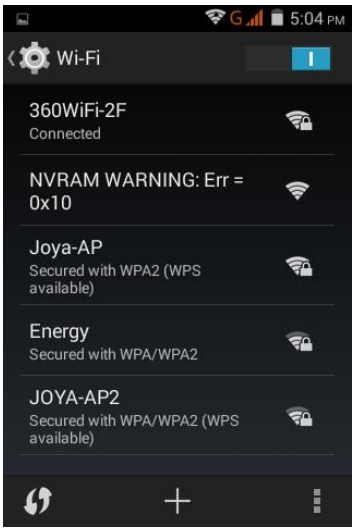




## Wifi Features

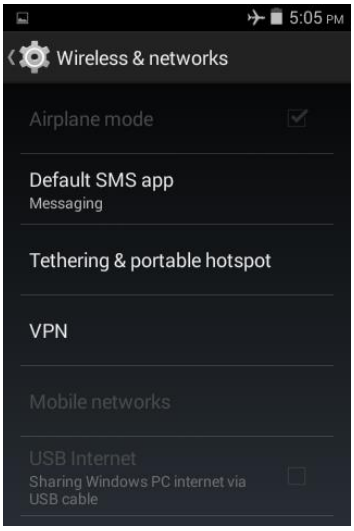
Select "Settings"-"Select Wi-Fi"- select "Add NETWORK ", select the desired access APN



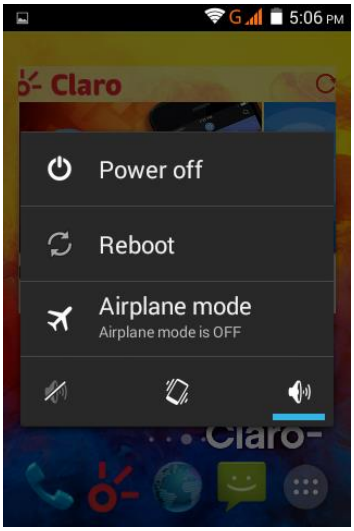


## Flight mode Function

Select "Settings"-"Select More"-" choose "Airplane Mode"function

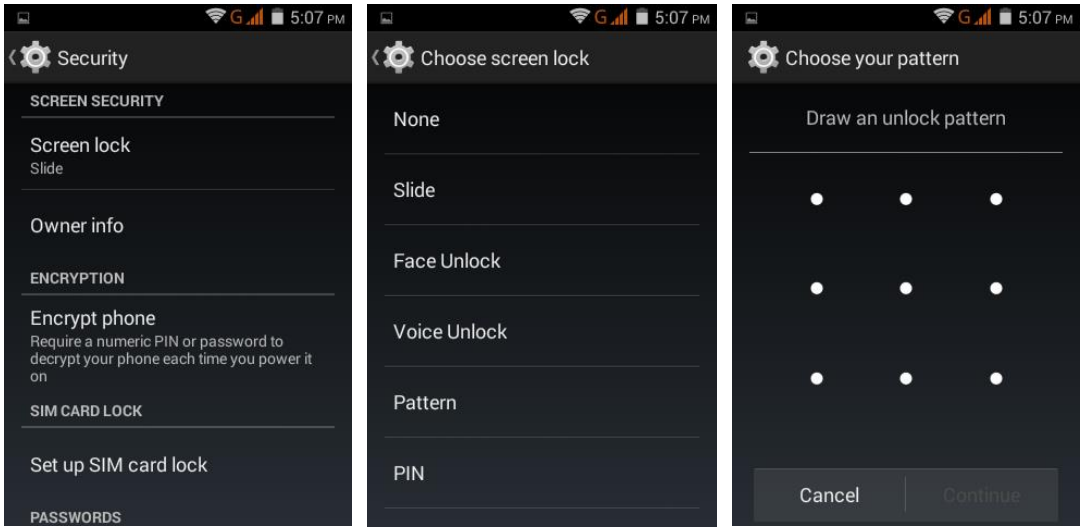


Or select the phone, "Off"button - "select the"Flight Mode "function



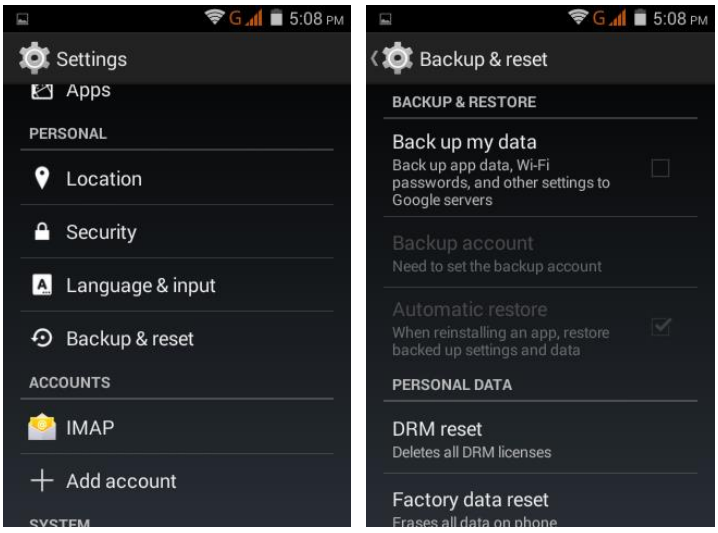
**Black unlock**

Select "Settings"-"Select " security "-" Select the " Screen lock"-Pattern



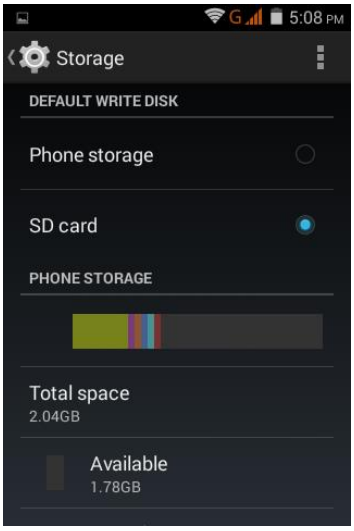
## Restore to factory default

Select "Settings"-"Select"Backup&reset "-" select "Factory data reset"



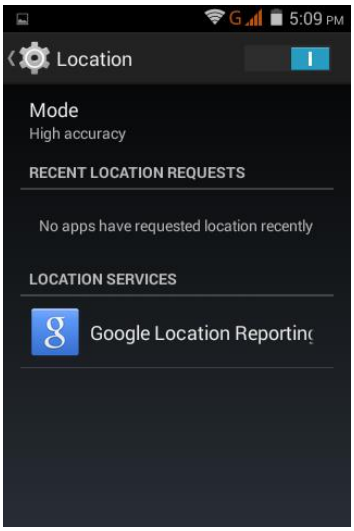
## Storage Settings

Select "Settings"-"Select"storage"



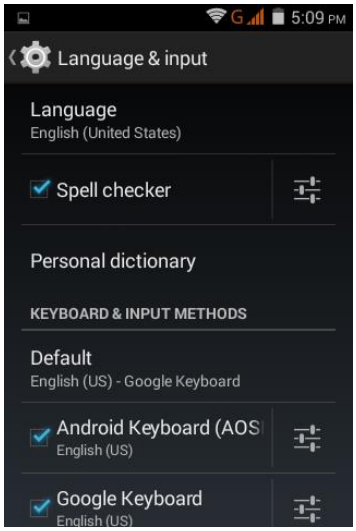
## GPS Settings

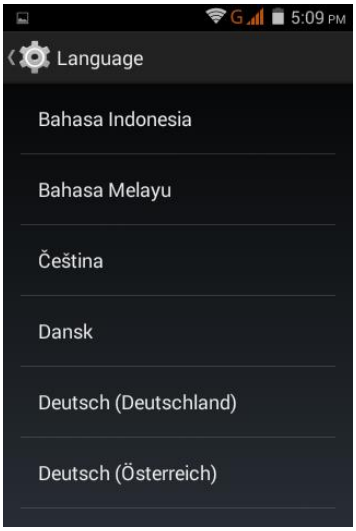
Select "Settings"-"Select " location"



## English language switching phone

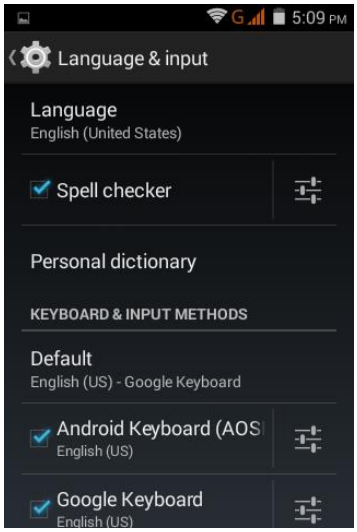
Select "Settings"- "Language & input "-" Select " Language ", select English or other

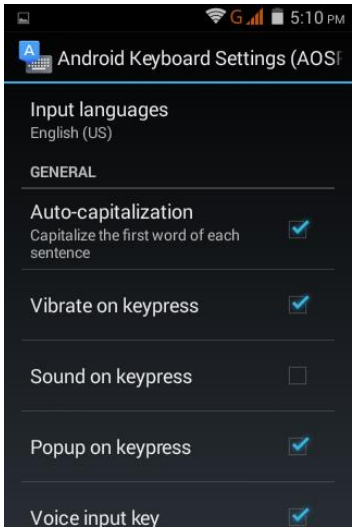




Input set

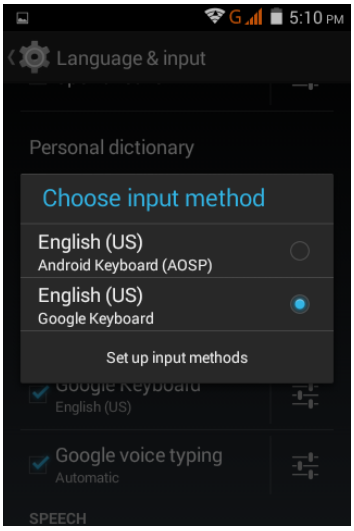
Select "Settings"- " Language & input "-click button





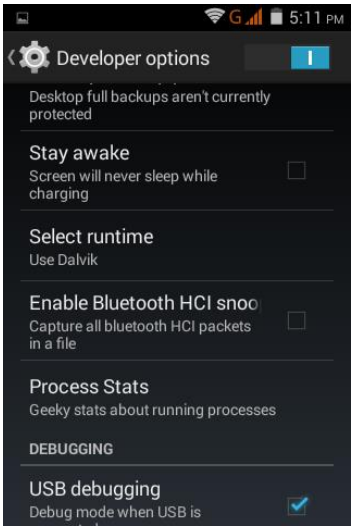
**Replacement mobile phone input method**

Select "Settings"- " Language & input "-Default



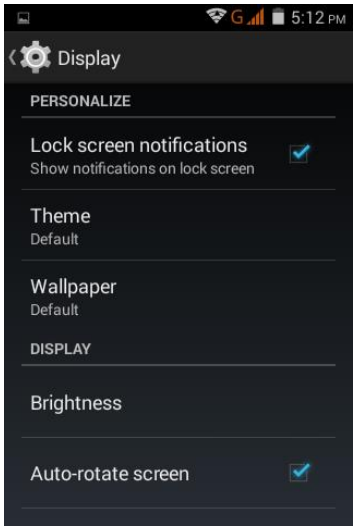
**Android phone data cable links**

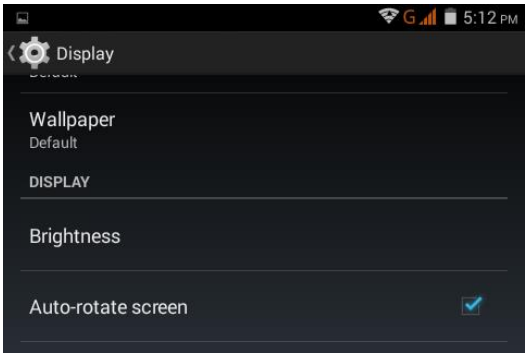
Select "Settings"-"Select"Developer options"-"Check"USB debugging " Products installed on your computer drive, the link on the USB cable;



**Introduce cross-screen display**

Select "Settings"-""Display "-"Check"Auto- rotate screen, " according to the phone automatically change the direction of rotation

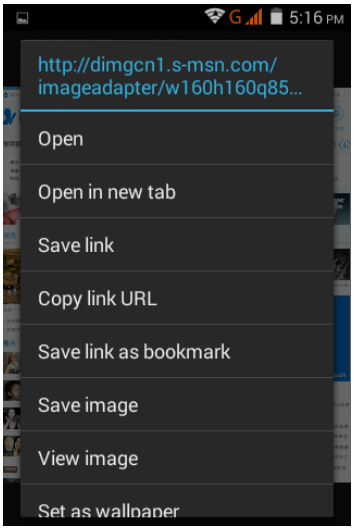




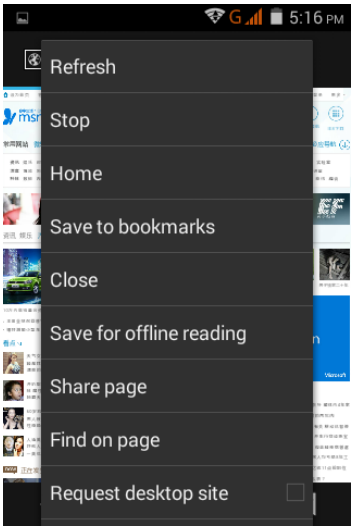
**Browser Features**

Visit the website
Browser - "Click url input area "-" Enter the URL of web browsing-click menu-refresh

Download Web page images or other objects
Browser - "browse the web, long press on the picture, there shortcut keys, choose "Save Image "function



Browser settings / search page
Browser - "browse the web -"click "menu button",-select settings / find on page



# Q/A

**1. How to turn off the software running in the background too much**

Download Advanced Task Manager Advanced Task Manager and select install, it can help you achieve, automatic end of the program services, to switch between programs, display memory information, exclusion list, an end of all widgets, fast uninstall program and other functions, To free up memory space, reducing the CPU's operation long pressure, increase speed, to extend the purpose of standby time.

## 2. How to quickly set up Email

In the Android system, can automatically set the POP3 or IMAP e-mail most accounts, the e-mail application, directly enter the e-mail address and password, if not automatically fit in the mailbox, the mailbox will be required by user Server information. See details in front of the "E-mail Features"section.

## 3. How do I view the capacity of SD card case

Message displayed on the principle that the display of the day time and date have shown that non-day

**24.How to open developer options**

Enter the Settings -- the About phone -- click the Build number five times, system will be generated developer options

## FCC Regulations:

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

FCC Note:

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user‘s authority to operate the equipment.

## RF Exposure Information (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR.
The SAR limit set by the FCC is 1.6W/kg.

This device is complied with SAR for general population /uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: WVB135M.

For this device, the highest reported SAR value for usage against the head is 1.16 W/kg, for usage near the body is 1.16 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10 mm between this device and your body.
RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.
